Introduction

The presented Annual Report discloses information on the results of production and economic activities of the Open Joint Stock Company Severneftegazprom (hereinafter referred to as “OJSC Severneftegazprom,” the “Company”) for 2019, and the sustainable development priority areas ensuring the achievement of the strategic goals of the Company.

When compiling the Report, all relevant information for the intended users was taken into account. Data officially recognized by the Company and confirmed by internal documentation is disclosed. The information in this report is presented using comparable techniques applied in previous periods. The Annual Report mainly does not use professional vocabulary and does not provide data requiring special knowledge.

The results of the Company’s activities in the field of sustainable development are disclosed in accordance with the standards of the Global Reporting Initiative — GRI Standards. The Annual Report of the Company for 2019 corresponds to the Core option of the GRI Standards. The validity of the selected sustainable development indicators received assurance of the independent auditor LLC FBK.

The report contains estimates and forecasts of the authorized management bodies of the Company, concerning the results of its activities and future events and/or actions, including plans of the Company; the probability of certain events occurrence and certain actions performance.

Due to their specificity, forecast statements are associated with an inherent risk and uncertainty of both general and private nature. The Company draws attention to the fact that actual results may differ significantly from directly or indirectly expressed forecast statements.

The report is published on the official website of the Company and distributed by direct mail to stakeholders. It is important for the Company to know the opinions, comments and suggestions of all stakeholders on the Report improving. For these purposes, you can fill out the form annexed at the end of the Report.
Message from Chairman of the Board of Directors

THE PARTICIPATION OF WORLD ENERGY LEADERS IN THE ROADMAP OF THE RUSSIAN REGION IS A VIVID EXAMPLE OF THE IMPLEMENTATION OF A COHERENT POLICY IN PRACTICE AIMED AT STRENGTHENING AND EXPANDING MUTUALLY BENEFICIAL ALLIANCES. THIS IS AN EXAMPLE OF THE SUCCESSFUL IMPLEMENTATION OF MODERN AND FAIR PRINCIPLES OF INTERNATIONAL ECONOMIC COOPERATION.

Dear shareholders and colleagues!

The year 2019 was a period of stable development for OJSC Severneftegazprom. The company strengthened the position as one of the leaders in gas production, collection, and transportation, enhanced technological competencies, and increased the efficiency of production activities. The Company continued to implement the planned strategy aimed at qualitative changes, primarily due to the active introduction of new technologies. Over the past period, the authors of OJSC Severneftegazprom have been awarded a diploma of the Ministry of Energy “For Contribution to the Innovative Development of the Fuel and Energy Complex”, N.K. Babakov Award for Innovative Clean Technologies.

One of the main directions of the Company’s technological development is the search for innovative methods of developing the hard-to-recover reserves. The project on commissioning the first start-up complex on the Turonian gas deposit of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field was successfully completed, which will allow maintaining the level of natural gas production in the values specified by the regulatory documents in the coming years.

Undoubtedly, the development of the Yuzhno-Russkoye Field plays a huge role in the development of the territories where the Company operates and in improving the quality of life. Our European partners and Company Shareholders — Wintershall Dea GmbH and OMV Exploration and Production GmbH — make a significant contribution to this great business. The scale of our Company’s activities tends to sustainable growth, which in parallel leads to an increase in the level of responsibility for creating safe conditions for employees, partners, and the population of the regions where the Company operates, and a reduction in the adverse impact on the environment. In 2019, the Company, represented by its General Director, was awarded the medal “For the Preservation of the Arctic.” The award is granted for the implementation of new technologies contributing to the development of the Arctic territories of the Yamal-Nenets Autonomous District and is a recognition of a significant contribution to the development of the District as a whole.

Now we are moving to a new stage of development. The strategy for the coming years has been approved, new key guidelines have been set. Improving the efficiency of existing assets, implementing significant projects on time and within the budget, updating the management model will allow us to implement the new technologies successfully and graduate the Company to a higher level, taking into account the challenges of the digital era.

Message from General Director

GUIDED BY THE PRINCIPLES OF HIGH CORPORATE RESPONSIBILITY, OJSC SEVERNEFTEGAZPROM MAKES A LARGE-SCALE CONTRIBUTION TO ENSURING FAVORABLE LIVING CONDITIONS IN THE TERRITORIES WHERE IT OPERATES, IN SUPPORT OF HEALTHCARE, SCIENCE, EDUCATION, CULTURE, AND SPORTS FOR REPRESENTATIVES OF THE INDIGENOUS PEOPLES OF THE NORTH.

Dear colleagues, shareholders, partners!

In 2019, our priority tasks were strengthening the resource and technological base, developing innovative forms of management and organizing production processes, and ensuring the financial stability of the Company. In the reporting year, OJSC Severneftegazprom reached a new level of performance, while maintaining a high degree of investment attractiveness. The company seeks to maximize the existing potential of gas deposits, the accumulated experience, and competencies to strengthen its position in the energy market.

The Company’s strategy is based on the principles of innovative development, providing a reliable technological base, and integrating digital solutions in management and production. The company makes significant investments in its technological solutions and equipment development. When implementing capital-intensive projects, we follow our key priority, i.e., ensuring a high level of labor protection, industrial safety, and environmental protection. The result of consistent actions in this area is the reduction of the industrial load on the natural environment.

We are aware that the long-term sustainable growth of the Company is based on the development of human resources. Staff development programs, advanced training, decent remuneration, and social guarantees for employees form a close-knit team of committed professionals. 2019 was a landmark year for our Company. This is the year of the 50th anniversary of the discovery of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field. The potential and new opportunities accumulated by the Company team is a reliable foundation for the confident development of OJSC Severneftegazprom in the long term. We are entering the year 2020 with clear goals, which achievement will be ensured by the investment program, relevant resources, and professionalism of the team. I express my gratitude to our shareholders for their trust and cooperation, to the employees of OJSC Severneftegazprom for their dedication and trouble-free operation. I am convinced that together we will maintain a high pace of development and continue the confident movement towards achieving our goals.

Sincerely,

Vladimir Dmitruk
General Director of OJSC Severneftegazprom

Sincerely,

Alexander Medvedev
Chairman of the Board of Directors of OJSC Severneftegazprom
Key Events of 2019

Within the framework of the working meeting between Alexey Miller, Chairman of the Management Committee of PJSC Gazprom and Rainer Seele, Chairman of the Management Committee of OMV AG, key issues of cooperation were considered.

A meeting of the Youth Council of OJSC Severneftegazprom was held, at which the work plan for 2019 was approved.

The grand opening of the OJSC Severneftegazprom Sparta-24, dedicated to the 60th anniversary of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field, took place.

The General Director of OJSC Severneftegazprom was solemnly awarded the medal “For the Preservation of the Arctic” for the introduction of new technologies contributing to the development of the Arctic territories of the Yamal-Nenets Autonomous District.

Representatives of the Youth Council of OJSC Severneftegazprom took part in the celebration of Fisherman’s Day in Krasnoselkup.

OJSC Severneftegazprom summed up the professional skill contest, the best locksmith in instrumentation and automation was determined.

Wells construction of the first start-up complex of the Turonian Gas Deposit was completed.

As part of the grand closing of the summer labor session in 2019, the Head of Novy Urengoy thanked OJSC Severneftegazprom for the assistance in employing minors during the holidays.
Key Events 2019

SEPTEMBER

OJSC Severneftegazprom was awarded the 2nd place in the nomination “The Best Employer for Employing Persons with Disabilities in the Yamal-Nenets Autonomous District.”

An Extraordinary General Meeting of Shareholders of OJSC Severneftegazprom was held, at which the composition of the Board of Directors and the Revision Commission was re-elected.

OJSC Severneftegazprom representatives were awarded the honorary title of Laureates of the N.K. Babakov Award.

A paintball tournament was held among subsidiaries of PJSC Gazprom of Western Siberia, dedicated to the 50th anniversary of the discovery of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field.

OJSC Severneftegazprom took part in events dedicated to the 75th anniversary of the founding of the Krasnoselkup District and the 90th anniversary of the foundation of village Tolka.

OCTOBER

OJSC Severneftegazprom took part in a working meeting of members of the Bundestag of the Federal Republic of Germany with deputies of the Legislative Assembly of the Yamal-Nenets Autonomous District.

OJSC Severneftegazprom took part in the IX Saint Petersburg International Gas Forum.

OJSC Severneftegazprom produced the first billion cubic meters of natural gas from the Turonian gas deposit in the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field.

OJSC Severneftegazprom won the annual competition in the field of innovation and inventive activities following the results of 2019, held among subsidiaries and organizations of PJSC Gazprom.

OJSC Severneftegazprom took part in the International Conference of the Society of Engineers of Oil and Gas Industry SPE in Russia and the Caspian Region, Moscow.

NOVEMBER

OJSC Severneftegazprom celebrated one of the main events of 2019 — the 50th anniversary of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field.

OJSC Severneftegazprom successfully completed a certification audit of the industrial safety management system for compliance with the requirements of international standard ISO 45001:2018 and a supervision audit of the integrated management system in the field of quality assurance, environmental protection, and energy management.

OJSC Severneftegazprom Youth Council organized and held an internal scientific and practical conference of young scientists and specialists dedicated to the 50th anniversary of the discovery of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field.

OJSC Severneftegazprom, the Administration of the Krasnoselkup District Municipal Formation, and the Yamal-to-Descendants Association of Indigenous Minorities of the North of Yamal-Nenets Autonomous District concluded an annual tripartite cooperation agreement for 2020.

OJSC Severneftegazprom summed up the professional skill contest for the title “Best in Profession” among electricians.

OJSC Severneftegazprom and the labor collective have concluded an agreement that will govern the relationship between the company and the staff in 2020–2021.

DECEMBER

OJSC Severneftegazprom took part in a working meeting of members of the Bundestag of the Federal Republic of Germany with deputies of the Legislative Assembly of the Yamal-Nenets Autonomous District.

OJSC Severneftegazprom produced the first billion cubic meters of natural gas from the Turonian gas deposit in the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field.

OJSC Severneftegazprom successfully completed a certification audit of the industrial safety management system for compliance with the requirements of international standard ISO 45001:2018 and a supervision audit of the integrated management system in the field of quality assurance, environmental protection, and energy management.

OJSC Severneftegazprom celebrated one of the main events of 2019 — the 50th anniversary of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field.

OJSC Severneftegazprom took part in events dedicated to the 75th anniversary of the founding of the Krasnoselkup District and the 90th anniversary of the foundation of village Tolka.

POSITION IN THE INDUSTRY AND DEVELOPMENT PROSPECTS

OJSC SEVERNEFTEGAZPROM IS ONE OF THE MAIN PRODUCING COMPANIES OF THE GAZPROM GROUP.

THE KEY PROJECT OF THE COMPANY IS THE DEVELOPMENT AND MANAGEMENT OF THE YUZHNO-RUSSKOYE OIL, GAS AND GAS CONDENSATE FIELD, WHICH IS ONE OF THE LARGEST OIL AND GAS CONDENSATE FIELDS IN RUSSIA.

THE GAS FIELD FACILITIES OF THE YUZHNO-RUSSKOYE FIELD ARE ONE OF THE MOST ADVANCED AND TECHNICALLY EQUIPPED IN RUSSIA TODAY — COMBINING WESTERN AND DOMESTIC TECHNOLOGIES, COMPLEMENTED BY RUSSIAN EXPERIENCE IN HARSH CLIMATIC CONDITIONS.

Ural Federal District remains the main gas production hub in the Russian Federation. According to the results of 2018, Gazprom Group enterprises produced 464.36 bln m³ of natural gas in the District.

FIELD FACILITIES OF THE YUZHNO-RUSSKOYE OIL, GAS AND GAS CONDENSATE FIELD

1. SWITCH VALVE STATION (SVS)
   Designed to ensure modulation of the header input block and loops of gas collection system

2. GAS SEPARATION STATION (GSS)
   GSS provides gas purification from mechanical impurities, droplet liquid, and gas-washout from condensates being fed to the booster compressor station

3. RECUPERATIVE HEAT EXCHANGERS
   For heat exchange between formation gas and compressed gas

4. GAS DEHYDRATION STATION
   Consists of two gas dehydration buildings GDB-1, GDB-2. It is intended for dehydration of the separated gas to the required gas dew point, in accordance with the requirements of STO Gazprom 089-2010 by the method of absorption drying of water vapor. Triethylene glycol (TEG) is used as an absorbent

5. BOOSTER COMPRESSOR STATION
   Provides compressing of pre-separated natural gas to the pressure required for its transportation from the gas treatment unit to the Purkazovskoye compressor station of commercial gas pipeline

6. GAS MEASURING STATION (GMS)
   Is intended for commercial metering of commercial gas supplied to the commercial gas pipeline

7. WAREHOUSE FOR STORAGE OF CHEMICALS, METHANOL
   Is intended for storage of reagents used in technological processes

8. REPAIR AND OPERATIONS BUILDING (ROB)
   Is intended for repair, revision of equipment at the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field

9. WATER TREATMENT FACILITIES (WTF)
   Are intended for the preparation of household drinking water, storage of industrial and fire water supplies, water supply to separate networks of industrial fire and household drinking water supply

10. SERVICE AND OPERATIONS BUILDING
    Two-story building equipped with power supply, ventilation, water supply, heating, sewage systems. The building includes a spacious lobby, 55 premises for various purposes for the administration and field facilities personnel, the main control panel for gas production, preparation, and transportation, a chemical and technical laboratory, a dining room for gas field facilities duty personnel

11. FIRE STATION
    A complex of premises designed to accommodate departmental fire unit employees and fire fighting equipment engaged in the prevention and suppression at the field facilities

12. TEG REGENERATION UNIT
    It is intended for restoring the desired concentration of a saturated glycol solution. The TEG regeneration unit consists of two technological lines with a nominal capacity 17 t/h each. All equipment of the regeneration unit, except for the regenerators, is located in the main building of the TEG regeneration unit. Glycol regenerators are located in separate rooms
EFFICIENCY OF GEOLOGICAL EXPLORATION WORKS AND APPLICATION OF THE STATE-OF-THE-ART TECHNOLOGIES IS THE KEY FOR SUCCESSFUL OPERATION

Yuzhno-Russkoye oil, gas and gas condensate field located in the north-eastern part of West Siberia is one of the largest fields in Russia in terms of reserve volume. Resource base of the field ensures stable production and is the potential for ongoing development for many years ahead and high financial results.

25 BLN M³ GAS PRODUCTION IN 2019 YEAR
### Status of Raw Material Base

As of December 31, 2019, all license obligations of the Company in terms of geological exploration are fulfilled completely. Changes to license SLKh № 11049 NE were registered under Registration № 5509 on November 15, 2016.

The development indexes of the Cenomanian and Turonian gas deposits correspond to the design values.
**RESEARCH AND TOPIC-SPECIFIC WORK**

**Scientific, technical, and case studies were carried out in accordance with the approved geological assignment:**

- Work on the project of additional exploration of hydrocarbon deposits of the Lower Cretaceous deposits of the Yuzhno-Russkoye Field within the Yuzhno-Russkoye license area were completed. The report was adopted at a meeting of the section on geological exploration and reserves of hydrocarbon deposits, hydro-mineral raw materials, and other subsoil resources of the Gas Industry Commission on Deposits Development and Subsoil Use. A positive conclusion was obtained from Federal State Budgetary Institution Rosgeolekspertiza.

- Work on compiling a report on the recounting of the initial hydrocarbon reserves in the Lower Cretaceous deposits of the Yuzhno-Russkoye Field as of January 1, 2017, were completed. For 01.01.2017, it is planned to submit a report on recalculating reserves and a geological model for examination by the Federal Budgetary Institution State Commission for Reserves, together with a technological project for the development of Lower Cretaceous deposits;

- Work on collecting, systematizing, and analyzing data on the results of core sample and fluid studies on wells drilled in the Yuzhno-Russkoye licensed area in order to compile an information resource continue (in 2019, work on stage 2 was completed, analysis of the planned 10 wells of the Yuzhno-Russkoye licensed area, a report on the completed works was presented), as well as work on the formation and storage of reference and representative core collections selected at the Yuzhno-Russkoye licensed area (in 2019, works on stage 2, the complex of scheduled work on the 6 wells were completed);

- Work to restore the safe condition of previously abandoned exploration wells of the old stock (6 wells), which are on the balance of the Interregional Territorial Administration of Rosimushchestvo, located on the territory of the Yuzhno-Russkoye and Yarvoye fields of the Yuzhno-Russkoye licensed area were completed. The works were performed in accordance with the requirements of the Oil and Gas Industry Safety Rules. Works to clean the mouth areas of the wells within a radius of 200 meters from scrap metal, construction waste, and waste left during the construction of wells were carried out. For the period 2018-2019, work on wells 5-7-9, 8-P of the Yuzhno-Russkoye Field, 226-2, 227-P, 229-P of the Yarvoye Field was performed.

- Work on bringing to a safe state 33 previously abandoned wells (restoration of concrete pedestals) have been completed. The work were performed in accordance with the requirements of the Oil and Gas Industry Safety Rules Of 33 previously abandoned wells, 11 are on the balance sheet of OJSC Severneftegazprom, 22 wells are on the balance sheet of the Interregional Territorial Administration of Rosimushchestvo in the Tyumen Region, Khanty-Mansi Autonomous District — Ugra, and the Yamal-Nenets Autonomous District;

- Work on creating a 1D (linear) geomechanical model for appraisal well № 62 was completed. The following results were obtained: 1D geomechanical model for 4 key boreholes with the calculation of the steady state of the wellbore; 1D geomechanical model for the design vertical appraisal well № 62 with the calculation of the steady state of the wellbore; risk assessment of geological complications was conducted, and recommendations were made for trouble-free drilling of the designed wells, including the optimal density of the drilling fluid recommendations were developed on a program of additional research for vertical appraisal wells for the tasks of geomechanical modeling;

- Work on creating a 3D geomechanical model of the Yuzhno-Russkoye Field for the entire sedimentary cover interval for planning geological and technological measures and optimal development continue In 2019, work in four stages were performed; the completion is scheduled for the end of 2020.

**Work on the systematization and storage of core sample material in the core storage in Tyumen, selected in the exploration wells of the Yuzhno-Russkoye license area continue;**

**Work on bringing to a safe state 33 previously abandoned wells (restoration of concrete pedestals) have been completed. The work were performed in accordance with the requirements of the Oil and Gas Industry Safety Rules Of 33 previously abandoned wells, 11 are on the balance sheet of OJSC Severneftegazprom, 22 wells are on the balance sheet of the Interregional Territorial Administration of Rosimushchestvo in the Tyumen Region, Khanty-Mansi Autonomous District — Ugra, and the Yamal-Nenets Autonomous District;**

**IN 2019, THE GAS PRODUCTION PLAN OF OJSC SEVERNEFTEGAZPROM WAS DETERMINED AS 25,000 MILLION M³**

**IN 2019, THE GAS PRODUCTION PLAN OF OJSC SEVERNEFTEGAZPROM WAS DETERMINED AS**

**25,000 MILLION M³**

**ACTUAL GROSS GAS PRODUCTION AMOUNTED TO 25,073 MILLION M³**

**PLANNED TASK COMPLETED FOR 100.29% (+73,058 MLN M³)**

**Production drilling**

In 2019, LLC RusGazBurenie completed the construction of 9 production wells (117 gas well cluster: № 1102, 1103, 1104; 137 gas well cluster: № 1362, 1303, 1304; 147 gas well cluster: № 1402, 1403, 1404) from 12 wells of the First Start-Up Complex of the Turonian gas deposit. A multistage hydraulically fractured was carried out in three subhorizontal production wells № 1100, 1303, 1304. In 2019, eleven wells were commissioned (well 1101 was commissioned in 2018). The construction of the First Start-Up Complex is completed. As of December 31, 2019, three production wells with an ascending structure were completed had started drilling (77 gas well cluster: № 701; 8T gas well cluster: № 801; 10T gas well cluster: № 1001) from 45 wells of the 1st phase at stage I of Turonian gas deposits development of the Yuzhno-Russkoye Oil, Gas and Condensate Field.

In 2019, upgrading work on production well № 381 commenced. The work is needed due to the bottom watering out of well № 381 K5S 38 in May 2019 The effectiveness of well recovery by sidetracking is justified by LLC Gazprom Geologorazvedka within the field supervision services in implementing the solutions of the Technological Scheme for the Development of Cenomanian and Turonian Gas Deposits of the Yuzhno-Russkoye Field. Work is performed in accordance with project documentation № 334-331/18/2-35U Upgrading of Production Gas Wells of the Yuzhno-Russkoye Field by sidetracking.

**Natural gas production**

**IN 2019, THE GAS PRODUCTION PLAN OF OJSC SEVERNEFTEGAZPROM WAS DETERMINED AS**

**25,000 MILLION M³**

**ACTUAL GROSS GAS PRODUCTION AMOUNTED TO 25,073 MILLION M³**

**PLANNED TASK COMPLETED FOR 100.29% (+73,058 MLN M³)**

Hard-To-Recover Reserves

DEVELOPMENT OF HARD-TO-RECOVER TURONIAN GAS RESERVES

The Turonian hydrogeological unit has a local distribution, occurring within a thick (800-1,000 m) clay mass being a regional seal for large gas accumulations in the Cenomanian, sometimes it contains industrial gas accumulations, at both the Zapolyarnoye and the Yuzhno-Russkoye Fields. Lithological layers of the formation are represented by sandstones and siltstones with an interlayer of aleurite clays with the inclusion of clay minerals (montmorillonite and mixed-layer formations) in rocks that swell when interacting with water, which have an adverse impact on the porosity values. Average weighted absolute permeability value is an order of magnitude lower than the Cenomanian rocks (52.35·10^-3 μm² — Cenomanian). Low formation temperatures (16–17 °C) contribute to the operation of wells in hydrate regime.

Independent development of the Turonian deposit began in accordance with the Project for Pilot Development of the Turonian Gas Deposits of the Yuzhno-Russkoye Field (2007). Pilot production began in December 2011 by the launch of one double-bottom-hole well connected into the gas collection network (GCN) of the Cenomanian field. In 2014, a pilot U-shape well was drilled. In 2016, a multistage gas collection network (GCN) of the Cenomanian field. In 2017, a new project document Technological Scheme for the Development of the Turonian and Cenomanian Gas Deposits was approved, providing for the development of the Turonian and Cenomanian deposits as separate objects with a joint gas collection and treatment system. The following technological solutions are provided for the development of the Turonian deposit:

- The duration of the development period is 125 years (2017–2141);
- Gas production should be carried out at 138 wells combined in 50 clusters;
- Maximum annual gas production — 9.36 bln m³;
- Average well production rate is 133.0 thousand m³/day;
- Cumulative gas production during the period of commercial operation — 239.378 bln m³;
- The use of a joint (existing) GCN.

Since 2018, a program for drilling the Turonian gas reservoir and bringing it to the design annual extraction level has been implemented.

The First Start-Up Complex comprises 3 cluster pads; 4 production wells were built at each site.

As of January 01, 2020, the results of well development were obtained for the clusters 11Т, 13Т, 14Т and for the wells R-35 and R-51. The range of magnification coefficients of the starting flow rate of the wells in relation to the design values amounted from 1.2 to 2.6.

In 2017, a new project document Technological Scheme for the Development of the Turonian and Cenomanian Gas Deposits was approved, providing for the development of the Turonian and Cenomanian deposits as separate objects with a joint gas collection and treatment system. The following technological solutions are provided for the development of the Turonian deposit:

- The duration of the development period is 125 years (2017–2141);
- Gas production should be carried out at 138 wells combined in 50 clusters;
- Maximum annual gas production — 9.36 bln m³;
- Average well production rate is 133.0 thousand m³/day;
- Cumulative gas production during the period of commercial operation — 239.378 bln m³;
- The use of a joint (existing) GCN.

Since 2018, a program for drilling the Turonian gas reservoir and bringing it to the design annual extraction level has been implemented.

The First Start-Up Complex comprises 3 cluster pads; 4 production wells were built at each site.

As of January 01, 2020, the results of well development were obtained for the clusters 11Т, 13Т, 14Т and for the wells R-35 and R-51. The range of magnification coefficients of the starting flow rate of the wells in relation to the design values amounted from 1.2 to 2.6.

CONSTRUCTION OF PRODUCTION WELLS ON THE TURONIAN DEPOSIT

In 2019, the construction of 9 production wells of the First Start-Up Complex for the Turonian gas deposit was completed. The grounds for their construction are the Design Project of the Cenomanian and Turonian Gas Deposits (the project prepared by LLC Gazprom Proektirovanie), and Group Working Project № 85/17-1 for the Construction of Production Wells with Filter Fracturing for the Turonian Gas Deposit*.

Of 12 wells located on 3 cluster sites, 9 wells with an upward design and 3 wells are subhorizontal with multi-stage hydraulic fracturing.

As of December 31, 2019, the construction of the First startup facilities was completed; all 12 wells were commissioned.

In November 2019, construction was commenced on the first phase (45 wells) of stage 1 (88 wells) for the additional development of the Cenomanian and Turonian gas deposits of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field.

In the first phase, it is planned to build 45 production wells at 16 cluster sites: 41 wells with an upward structure and 4 subhorizontal wells with multistage hydraulic fracturing of formation.

** Approved by Minutes № 203 dated June 9, 2019.
CONTINUOUS INNOVATIVE DEVELOPMENT IS THE BASIS FOR OJSC SEVERNEFTEGAZPROM EFFICIENT OPERATION
To solve the problems of effective joint development of the Cenomanian and Turonian gas deposits, taking into account the significant difference in the values of thermobaric parameters of the wells and other technological constraints, within the frames of the implementation of the “Industry 4.0” concept, a project is being developed at OJSC Severneftegazprom to create a digital twin of the geological and technological model: reservoirs — wells — gas collecting system — switching valves of the Yuzhno-Russkoye Field.

As part of the research, studies have been carried out, the theoretical and practical significance of the application of the Digital Twin, the optimal software and hardware architecture of the Digital Twin powered by artificial intelligence have been determined and substantiated.

The scientific novelty of the research results consists in the possibility of modeling the objects and processes in a digital environment by using artificial intelligence capable of making effective decisions independently, at the joint development of the Cenomanian and Turonian gas deposits of the Yuzhno-Russkoye Field.

THE NET PRESENT VALUE OF THE INVESTMENT PROJECT IS RUB 5,523.9 MILLION, THE INTERNAL RATE OF RETURN IS 32.1%, WHICH IS CONFIRMED BY THE FEASIBILITY STUDY.

The innovative project has no analogs not only in Russia, but also in world practice. The strategy provides to carry out development work with the development of a technical design project and budget documentation in 2020. The introduction of a unique software and hardware complex is planned for 2022 Q1.
In accordance with the Regulation on the Competition and on the grounds of the Competition Commission minutes of results of coefficients calculating for the inventive and innovation activities of PJSC Gazprom subsidiaries dated July 9, 2019:

OJSC Severneftegazprom in the category PJSC Gazprom Subsidiary, which achieved the best performance in inventive activities at the end of 2018, took 1st place.

The Company’s team was awarded the Certificate of Honor of PJSC Gazprom (Order № 336 of PJSC Gazprom dated August 8, 2019).

The competition is held annually in order to:

- Stimulate the inventive and innovation activities in PJSC Gazprom subsidiaries;
- Increase the creative activity of employees, involve them to improve technological and production processes contributing to the quality improvement concerning production, transportation, gas processing, saving fuel and energy resources, increasing labor productivity, improving working conditions, labor protection, and organization of production.

OJSC SEVERNEFTEGAZPROM TRADITIONALLY PAYS SPECIAL ATTENTION TO THE DEVELOPMENT OF INNOVATION AND STRIVES TO USE THE MOST ADVANCED TECHNOLOGIES AND MODERN EQUIPMENT IN ITS WORK.

The professional engineering team of the Company is actively searching for new effective scientific and technical solutions that take into account the specifics of the tasks facing OJSC Severneftegazprom.

All the most important, interesting, and promising technical and organizational decisions of the Company’s employees undergo a patenting process with a view to the possibility of their implementation at the enterprises of the fuel and energy complex under license agreements.

In 2019, the following objects of patent and copyright were registered in the State Register of the Russian Federation:

- Automated Learning Method (patent for invention № 2697957);
- A device for moving a replaceable flowing part of a centrifugal compressor of a gas pumping unit (utility model patent № 188615);
- The software package “Seismic Exploration Archive” computer software certificate № 2019612180);
- The software complex PrintControl computer software certificate № 2019613334);
- Watcher Traffic SNMP (wtraf), computer software certificate № 2019663659).

As of December 31, 2019, the Company has 34 patent objects and 4 copyright objects, 32 of which are used in manufacturing activities.
Innovation activities

Innovation activities aim to increase the efficiency of the existing production and organizational processes of OJSC Severneftegazprom.

Motivation of the Company’s employees by various kinds of incentives contributes to the constant search for nonstandard technical solutions.

Every year, not only the number of proposed technical improvement proposals increases but also the number of employees involved in the development of the Company’s innovative activities.

REPRESENTATION OF OJSC SEVERNEFTEREGAZPROM IN THE COMPETITIONS:

International Competition of Scientific, Technical, and Innovative Developments aimed at the development of the fuel and energy and mining sectors of 2019

The work of OJSC Severneftegazprom on the topic “Development and implementation of scientific and technical solutions to increase the efficiency of preventive work in wells without a major overhaul” was awarded the prize of the second degree laureate at the competition of the Ministry of Energy of the Russian Federation.

Nikolai Konstantinovich Baybakov Public Prize in the field of sustainable development of energy and society

The work of OJSC Severneftegazprom on the topic “Innovative clean Technologies for the Preparation and Purification of Groundwater with Complex Chemical Composition” was awarded the prize “For Great Achievements in Solving the Problems of Sustainable Development of the Energy and Society.”
INVESTMENT MANAGEMENT SYSTEM OF OJSC SEVERNEFTEGAZPROM BASED ON THE PRINCIPLE OF EFFICIENCY
The main goals and objectives of the investment program of the Company:

- Implementation of key indicators of the Long-Term Development Plan and the Budget of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field;
- Accomplishment of the exploration plan in accordance with the existing license obligations;
- Implementation of approved design solutions ensuring commissioning, upgrading, modernization, and retrofitting of production facilities of the main and auxiliary production.

Implementation of the Company’s investment projects for upgrading, modernization, retrofitting, and technical reequipment is aimed at increasing production capacity by updating, quality improvement, and quantitative expansion of fixed assets as well as technical enhancement and improvement of production and management efficiency. Construction of facilities is carried out in close cooperation and with the operational interaction of the Company’s services and contracting organizations representatives.

INVESTMENTS IN THE DEVELOPMENT AND ARRANGEMENT OF THE CENOMANIAN AND TURONIAN DEPOSITS

In accordance with the Design project of the Turonian and Cenomanian gas deposits of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field and the Company’s existing licensing obligations, in the reporting period, the work was performed on the following facilities:

- Construction and development of the Turonian gas deposit of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field. First Start-Up Complex;
- Development of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field. GTU. Booster compressor station № 2;
- Well R-35 construction;
- Well R-51 construction;
- Construction and development of the Cenomanian and Turonian gas deposits of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field. First stage.

The development of projects was carried out upgrading the operating gas wells of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field by sidetracking.
The works on upgrading the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field roads are under performance: Road Urengoy — Krasnolekup, Area of the Yuzhno-Russkoye Oil and Gas Field — Beregovoye Gas Condensate Field — 68.716 km; Access road to the PSFS. PK Section 0+00 — peg 122+79.25; Access road to PSFS. PK Section 122+79.25 — PSFS; Access road: Commercial gas pipeline, 64 km.

The following design work was completed:

- Upgrading of the premises at the Administrative building and muster station of the shift workers in the city of Novy Urengoy;
- Modernization and retrofitting ETMG SC. Engineering and Technical Means of Guarding for the Shift Camp of the Yuzhno-Russkoye Oil and Gas Field (ETMG SC. Correction);
- Technical reequipment of the facilities. GTU: Site utility networks: Water supply and sewage networks;
- The geotechnical monitoring system of OJSC Severneftegazprom facilities;
- Technical reequipment of automatic fire extinguishing and fire alarm systems, warning and evacuation control systems in buildings and structures of OJSC Severneftegazprom.

INVESTMENTS IN OBJECTS OF UPGRADE, MODERNIZATION, RETROFITTING, AND TECHNICAL REEQUIPMENT

In 2019, works were completed at the following facilities:

- Technical reequipment of gas facilities of the Yuzhno-Russkoye Oil and Gas Field. (Equipment for metering electric energy by piping electrical heating panels);
- Technical reequipment of ESP;
- Technical reequipment of facilities of the Yuzhno-Russkoye Oil and Gas Field;
- Modernization of the ICS of the Yuzhno-Russkoye Oil and Gas Field.

INVESTMENTS IN ADMINISTRATIVE FACILITIES

In order to improve the functional parameters of the facilities, work on retrofitting the shift workers muster station in Krasnolekup were performed.

A significant increase in capital investments in the reporting period is due to the following activities:

- Construction and development of the Turonian gas deposit of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field. First Start-Up Complex;
- Development of wells R-35, R-51 of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field;
- Modernization of the ICS of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field;
- Development of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field. GTU. Booster compressor station Nº 2;
- Construction and development of the Cenomanian and Turonian gas deposit of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field. First stage;
- Technical re-equipment of ESP.

## Activities

### Investment

- **E&D of future years, including:**
  - Design work on the development of the Lower Cretaceous and Jurassic deposits of the Yuzhno-Russkoye Oil and Gas Condensate Field;  
  - A comprehensive project for the development of the Yuzhno-Russkoye Field;  
  - Development of a project "Upgrading the Premises at the Administrative Building and the Shift Workers Muster Station in Novy Urengoy;"  
  - Development of a project for upgrading the production gas wells of the Yuzhno-Russkoye Field by sidetracking;  
  - Development of a project "Modernization and Retrofitting. ETMG SC. Engineering and Technical Means of Guarding for the Shift Camp of YRPF (ETMG SC. Correction);"  
  - Development of a project "Technical Reequipment of the facilities. GTU: Site utility networks: Water supply and sewage networks;"  
  - Development of a project "The System of Geotechnical Monitoring of the Facilities of OJSC Severneftegazprom;"  

- **E&D of the future years, including:**
  - Development of a project "Technical Reequipment of the facilities. GTU: Site utility networks: Water supply and sewage networks;"  
  - Development of a project "The System of Geotechnical Monitoring of the Facilities of OJSC Severneftegazprom;"  

- **Engineering preparation, road to SGC № 16T, Gas wells №№ 1601, 1602, 1603 piping;**
- **Engineering preparation, access road to SGC № 39T, Gas wells №№ 3901, 3902, 3903, 3904 piping;**
- **Engineering preparation, roads, loops, development of 22 well clusters in the Turunin gas deposits of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field. First stage;**
- **Integrated information protection system of information management system of industrial and economic activities (1st priority) of OJSC Severneftegazprom;**
- **Upgrading the Yuzhno-Russkoye Oil and Gas Condensate Field roads: Road Urengoy — Krasnoselkup. Area of the Yuzhno-Russkoye Oil and Gas Field — Beregovoye Gas Condensate Field — 68.716 km, Access road to the PSFS. PK Section 0+00 — peg 122+79.25, Access road to PSFS. PK Section 122+79.25 — PSFS, Access road: Commercial gas pipeline, 64 km.**
- **Upgrading BCS-1 (GSUs №№ 1 ... 4);**
- **Retooling of the facility. ETMG SFS. Engineering and Technical Means of Guarding the PSFS, GTU, ESP (STP equipping with anti-ram device);**
- **Retooling of the facility. Communication center: PRS-34, PRS-65, PRS-93, URS-1 — retrofitting with a set of engineering security equipment;**
- **Retooling of the facility. Customer-based AHF — retrofitting with a set of engineering and technical means of guarding;**
- **Purchases of noncurrent assets (R&D, IA).**
SUSTAINABLE FINANCIAL PLIGHT IS THE BASIS FOR RELIABLE PRODUCTION

Monitoring for the growth of operating costs and the implementation of cost optimization measures ensured the fulfillment of all established production tasks for 2019.
### Key financial indicators

**Indicators of the statement of financial results**

The long-term agreements concluded by OJSC Severneftegazprom for the sale of produced gas ensure in full the regular receipt of revenues and guarantee the paying sales market throughout the entire period of development of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field.

The volume of natural gas sales in 2019 amounted to 24,823 mln m³. Revenue from gas sales in 2019 increased by 8% compared to the last year and amounted to 51,742 million rub. An 8% increase in 2019 compared to the previous period was due to higher gas selling prices under long-term gas sales agreements.

* Expenses for gas production — all expenses included in the prime cost (works, services), excluding depreciation, tax deductions.
** Accrued interest expense related to the increase in the present value of long-term estimated liabilities for the reserve for decommissioning of fixed assets and the regeneration of natural resources.
These expenses are due to the accrual of estimated liabilities for decommissioning of fixed assets and the regeneration of natural resources in accordance with RAS 8/2010 “Estimated Liabilities, Contingent Liabilities, and Contingent Assets.”

A decrease in the prime cost of production through the changes in tax deductions due to a decrease in the natural gas MET rate had a positive effect on the Company’s net profit indicator for 2019.

Due to the outflow of funds for financing capital investments related to the project “Implementation of the Second Stage of the Design Project for the Development of the Cenomanian and Turonian Gas Deposits of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field of OJSC Severneftegazprom,” a decrease in the amount of funds placed in deposit accounts and, as a result, a decrease in interest receivable occurred in 2019.

The increase in estimated liabilities in 2019, as compared to 2018, is associated with an increase in their present value and, as a result, an increase in interest payable.

The requirements for the quality of gas supplied to Customers are regulated in accordance with STO Gazprom 089-2010 “Combustible natural gas supplied and transported through gas pipelines. Technical conditions.” This standard is aimed at improving product quality and ensuring the efficiency and safety of gas pipeline systems.
GAS PRODUCTION COSTS (excluding tax, depreciation, and exploration expenses)

A 3% increase in production costs for gas production in 2019 is mainly due to an increase in labor costs, social benefits, and payments by 3% (wage indexation) and an increase in operating costs due to an increase in the production wells stock.

STRUCTURE OF GAS PRODUCTION COSTS

- Labor costs, social benefits, and payments: 47%
- Insurance contributions: 15%

</tbody>
</table>

The main part (98%) in the tax structure falls on deductions on the mineral extraction tax (MET).

The calculation formula for the natural gas MET rate has been established in accordance with the Tax Code of the Russian Federation.

An 8% decrease in MET expenses in 2019 was due to a decrease in the weighted average annual rate of the specified tax (from 1,349 RUB per thousand m³ of Cenomanian, 263 RUB per thousand m³ of Turonian in 2018 to 1,255 RUB per thousand m³ of Cenomanian and 259 RUB per thousand m³ of Turonian in 2019).
### ASSETS

**IN 2019, THE COMPANY’S ASSETS GREW BY 11%, OR BY 6.1 BLN RUB.**

**THE VALUE OF ASSETS AMOUNTED TO 60.98 BLN RUB AT THE END OF 2019 60.98 BLN RUB.**

**Change in the Company assets in 2019 occurred for the following items:**

- Fixed assets increased by 2,995 MLN RUB, or 8%, due to an increase in the commissioning of facilities and an increase in the indicator of incomplete capital expenditures for 2019 by 2,965 MLN RUB, or 125%;
- Receivables increased by 244 MLN RUB, or 3%, due to an increase in advances issued in respect of future deliveries of goods (works and services);
- Deferred tax assets increased by 866 MLN RUB, or 68%;
Changes in the Company liabilities in 2019 occurred for the following items:

An increase in long-term liabilities by 4,530 MLN RUB, or 60%, was due to the creation of a reserve and an increase in the accrued amount of the estimated liability for the decommissioning of fixed assets and the regeneration of natural resources due to the expansion of fixed assets.

A decrease in short-term liabilities by 1,019 MLN RUB, or 12%, was due to a decrease in payables for taxes and fees.

* The indicator presents the effect of cash outflows from the use on investment activities. In 2019, 2,485 MLN RUB more than in 2018 were spent, therefore, the funds balance of the company decreased, therefore the indicator has a negative value.

** The indicator presents the effect of cash outflows from the use on financial activities. In 2019, 1,032 MLN RUB more than in 2018 were spent, therefore, the funds balance of the company increased, therefore this indicator has a positive value.
THE SUSTAINABLE DEVELOPMENT POLICY OF OJSC SEVERNEFTEGAZPROM IS AIMED AT IMPROVING THE ECONOMIC, ENVIRONMENTAL, AND SOCIAL PERFORMANCE OF THE COMPANY THROUGH THE BALANCED USE OF NATURAL RESOURCE POTENTIAL, MAINTAINING THE STABILITY OF SOCIAL AND CULTURAL SYSTEMS TO MEET THE NEEDS OF CURRENT AND FUTURE GENERATIONS.

THE COMPANY ANNUALLY PREPARES A SUSTAINABILITY REPORT IN ACCORDANCE WITH INTERNATIONAL STANDARDS OF THE GLOBAL REPORTING INITIATIVE — GRI STANDARDS.
Prioritizing

OJSC Severneftegazprom builds its work in accordance with the sustainable development concept adopted in the Russian Federation and worldwide, which provides a balanced approach to solving socioeconomic problems, issues of maintaining healthy environment, and natural resource potential in order to meet the needs of both the present and the future generations.

Since 2011, the Company annually discloses nonfinancial information in the field of sustainable development as part of the Annual Report. When preparing the Report, the Company focuses primarily on the interests of stakeholders, which may have an impact on the activities of the Company or may be influenced by the Company’s activities. The content of the Sustainability Report for 2019 was formed on the basis of monitoring and identifying significant topics in the course of interaction with stakeholders.

Based on the analysis of the information obtained, at the end of 2019, a meeting of the working group on sustainable development was held at which material topics were approved for inclusion in the Company’s Annual Report for 2019.

This report has been prepared in accordance with the GRI Standards: Core option.
Based on the results of the assessment conducted by the working group, the following material topics were identified:

- employment;
- health and safety at the workplace;
- training and education;
- rights of indigenous and minority peoples;
- asset integrity and technological security;
- energy;
- water;
- emissions;
- discharges and waste;
- economic performance;
- procurement practices;
- reserves.

In addition to the material topics identified by the working group, this Report also considered additional aspects providing the most complete picture of the Company’s impact on the economy, social area, and environment. A table containing a complete list of material topics disclosed in the Report, as well as pages locating the relevant indicators, is presented in Annex 2 — GRI Content Index.

In preparing this Report, we used the data of management accounts, statistics and accounting statements of OJSC Severneftegazprom, drawn up in accordance with Russian Accounting Standards (RAS), published on the official website of the Company at www.severneftegazprom.com.
Environmental protection

Continuous improvement of approaches in the field of environmental safety allows the Company to achieve the most harmonious use of natural resources and minimize adverse impact on the environment.

A practical tool for implementing the sustainable development principles in the field of environmental protection is the environmental management system operating in the Company, certified for compliance with the requirements of international standard ISO 14001. As part of the requirements of environmental legislation, the Company carries out operational environmental monitoring at its facilities, which ensures compliance with established standards and the conservation of natural resources.

Significant attention in the environmental management system at OJSC Severneftegazprom is paid to constant monitoring of key environmental indicators in the area of operation of the main production facilities. The Company carries out operational environmental monitoring in accordance with the Program for Environmental Monitoring of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field Territory for the period 2016-2020, which ensures the assessment of the anthropogenic load on the environment and the obtaining of objective information about its condition.

The results of these studies show that there were no signs of environmental degradation as a result of the Company’s production activities during the reporting period. The ecological state of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field territory remains stably favorable.

Company. The volume of direct GHGs emissions amounted to 477.264 thousand tons in CO₂ equivalent in 2019.

Indirect emissions come from sources belonging to other organizations. Under the current legislation, the Company does not need to record indirect emissions. The Company applies the methods of the labor protection management system of Wintershall Dea GmbH for calculation of indirect emissions, according to which no indirect emissions were recorded in the reporting period. This methodology involves accounting for indirect greenhouse gas emissions only at production facilities.

In accordance with the Environmental Policy, one of the obligations voluntarily taken by OJSC Severneftegazprom is the implementation of all possible measures aimed at preventing

### POLLUTANT EMISSIONS

One of the significant areas of environmental activities of OJSC Severneftegazprom is air protection.

At the end of 2019, the total mass of pollutant emissions amounted to 3.003 thousand tons (including 2.991 thousand tons of YROGGCF emissions), which is 0.437 thousand tons more than in 2018. This is due to increased fuel gas consumption for compressing.

The company regularly conducts research on the assessment and accounting of GHGs emissions. Direct emissions include emissions from sources owned by the Company. The volume of direct GHGs emissions amounted to 477.264 thousand tons in CO₂ equivalent in 2019.

Indirect emissions come from sources belonging to other organizations. Under the current legislation, the Company does not need to record indirect emissions. The Company applies the methods of the labor protection management system of Wintershall Dea GmbH for calculation of indirect emissions, according to which no indirect emissions were recorded in the reporting period. This methodology involves accounting for indirect greenhouse gas emissions only at production facilities.

In accordance with the Environmental Policy, one of the obligations voluntarily taken by OJSC Severneftegazprom is the implementation of all possible measures aimed at preventing

- **POP**: Persistent organic pollutants
- **HAP**: Hazardous air pollutants
adverse environmental impact. Reducing GHGs emissions to mitigate the effects of climate change is recognized by the world community as one of the priority tasks.

The Company is working on the reduction of GHGs emissions into the air. The innovative projects developed and implemented by the specialists of OJSC Severneftegazprom ensured a significant reduction in GHGs emissions.

**WASTE MANAGEMENT**

When implementing environmental programs, much attention is paid to waste management. In carrying out its production activities, OJSC Severneftegazprom seeks to implement the most advanced practices and technologies for minimizing the amount of waste generated and is steadily improving its methods of disposal and processing.

**THE TOTAL MASS OF WASTE GENERATED IN 2019 WAS 901 TONS**

Due to the innovative activities of the employees of OJSC Severneftegazprom, it was possible to avoid additional direct GHGs emissions of methane in the amount of 34.225 thousand tons in CO2 equivalent.

Following the production control and laboratory studies, excesses of the established standards for maximum permissible emissions for all emissions sources were not registered in 2019.

Accidental emissions of pollutants into the environment also did not occur.

**MASS OF HAZARDOUS AND NONHAZARDOUS WASTE OF THE COMPANY FOR THE PERIOD 2017–2019, T**

**IN 2019, THE COMPANY CARRIED OUT MEASURES FOR THE RECLAMATION OF DISTURBED LANDS WITH AN AREA OF 7 HECTARES**

The total mass of waste generated in 2019 amounted to 901 tons. The increase in waste generation is associated with the planned decommissioning of material and technical equipment unsuitable for further use, an increase in the amount of coke during the operation of the Flotvegg sewage treatment plant, upgrading the existing and construction of new field development facilities.

In accordance with the concluded agreements, wastes of I-IV hazard classes that are not subject to waste disposal, as well as wastes of V hazard class, which are secondary resources, were transferred to third parties for the use, disposal, or recycling.

During 2019, the following wastes were delivered: I hazard class — 0.166 t; II hazard class — 15.125 tons; III hazard class — 18.823 tons; IV hazard class — 99.2 tons; V hazard class — 45.7 tons. Data includes 29.334 tons of waste accumulated in 2018.

The Company’s income from the sale of waste for further disposal amounted to RUB 679 thousand.

**WATER SUPPLY**

Water resources of Russia are estimated as one of the largest in the world, but this does not relieve domestic gas companies from their obligations on conservation of water resources.

To meet its production and business needs, the Company extracts water from the underground horizon. Water is not taken from surface water bodies. In the reporting period, 93.83 thousand m³ of water was extracted from underground sources. Of these, 80.76 thousand m³ accounted for the subsurface water horizon, and 13.07 thousand m³ was the water extracted along with natural gas (condensate).
The Company uses a recycled water supply system that allows for reuse of purified water. This system is equipped with sports and recreational facilities and utility facilities operated on the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field territory. As a result of its use, the total volume of water reused in 2019 amounted to 809.54 thousand m³.

In general, the volume of wastewater discharged into the absorbing horizon for the reporting period amounted to 80.21 thousand m³, which is fully consistent with the technological design, including produced water without use — 13.07 thousand m³, domestic and industrial wastewater — 67.14 thousand m³.

The company regularly conducts laboratory and instrumental control of surface, underground, groundwater, and wastewater. Sewage is carried out into the Cenomanian aquifer by pumping wastewater into disposal wells at a sewage injection site. Before injection, domestic wastewater is treated at the AE-150B domestic wastewater treatment plant with a capacity of 150 m³/day, industrial wastewater is treated at the Flottweg sewage treatment plant, with a maximum capacity of 15 m³/h. The quality of wastewater treatment sent to the injection meets the established requirements.

THE COMPANY'S KEY PERFORMANCE INDICATORS IN THE FIELD OF ENVIRONMENTAL PROTECTION
Energy consumption and energy saving

To reduce energy consumption, the Company regularly conducts research and activities to introduce energy-saving technologies and increase energy efficiency. In 2019, an external supervisory audit of the energy management system was successfully passed for compliance with the requirements of international standard ISO 50001, according to the results of which the system was recognized as effective, no inconsistencies were revealed by the auditors. The system is focused on ensuring the continuous improvement of consumption indicators, more efficient use of available energy sources, reduction of GHGs emissions, and other environmental impacts. The scope of the energy management system covers the main and auxiliary processes of production, preparation, and sale of hydrocarbons.

Energy efficiency improvement activities at OJSC Severneftegazprom are regulated by the Regulation on the Energy Management System as well as the Energy Policy which formulates strategic goals. The main lines of activities to improve energy efficiency, as well as specific tasks and indicators expected to be achieved in 2019–2021, are outlined*

ENERGY CONSUMPTION

In 2019, as part of the energy management system, the Company implemented measures to reduce energy consumption by replacing spotlights with arc sodium lamps for LED spotlights.

**IN 2019, THE COMPANY SAVED MORE THAN 10,700 KWH**

ELECTRICITY CONSUMPTION, MLN KWH

<table>
<thead>
<tr>
<th>Year</th>
<th>Total electricity consumption</th>
<th>Electricity of own production</th>
</tr>
</thead>
<tbody>
<tr>
<td>2019</td>
<td>40.0</td>
<td></td>
</tr>
<tr>
<td>2018</td>
<td>38.20</td>
<td></td>
</tr>
<tr>
<td>2017</td>
<td>36.40</td>
<td></td>
</tr>
</tbody>
</table>

The increase in electricity consumption compared to the indicators for 2018 was due to the need for power supply to capital construction facilities and contractor carriages.

As one of the leading gas producing companies, OJSC Severneftegazprom sets a goal to minimize natural gas consumption during its production.

NATURAL GAS CONSUMPTION, MLN M³

<table>
<thead>
<tr>
<th>Year</th>
<th>Total electricity consumption</th>
<th>Electricity of own production</th>
</tr>
</thead>
<tbody>
<tr>
<td>2019</td>
<td>249.4</td>
<td></td>

<td></td>
</tr>
<tr>
<td>2018</td>
<td>40</td>
<td></td>
</tr>
<tr>
<td>2017</td>
<td>38</td>
<td></td>
</tr>
</tbody>
</table>

The decrease in heating energy consumption compared with the indicators for 2018 was due to the increased average annual ambient temperature.

*The energy policy of OJSC Severneftegazprom is open and accessible to all stakeholders on the Company’s website (www.severneftegazprom.com).
REDUCTION OF ENERGY CONSUMPTION

To increase energy efficiency, OJSC Severneftegazprom carries out a set of organizational, economic, and technological measures aimed at increasing the value of conservation of energy resources in the manufacturing sector.

In its activities, the Company sets goals to reduce the amount of energy consumed and to reduce the environmental impact, which was the reason for OJSC Severneftegazprom to develop and approve the Program for Energy Saving and Energy Efficiency OJSC Severneftegazprom, as well as Goals and objectives in the field of energy management system.

In order to reduce the amount of energy consumed, OJSC Severneftegazprom takes measures aimed at:

- Effective approach and improvement related to the energy saving programs;
- Use of advanced technologies to minimize the environmental impact of production.

OJSC SEVERNEFTEGAZPROM CONSIDERS OCCUPATIONAL AND INDUSTRIAL SAFETY AS KEY FACTOR FOR THE SUSTAINABLE DEVELOPMENT OF ITS BUSINESS AND AS THE MOST IMPORTANT COMPONENT OF CORPORATE SOCIAL RESPONSIBILITY TO BOTH THE PRESENT AND THE FUTURE GENERATIONS.

Particular attention at OJSC Severneftegazprom is paid to creating an effective industrial and occupational safety management system. This is primarily due to the fact that modern gas fields are complex, potentially hazardous production facilities and the risks of various accidents and emergencies at such facilities are fraught with serious consequences.

For this purpose, the Company introduced and effectively operates an integrated management system in the field of quality assurance, environmental protection, industrial safety based on international standards ISO 14001, ISO 9001, ISO 45001:2018. Based on these standards, since 2009, OJSC Severneftegazprom has implemented a Policy in the Field of Quality Assurance, Environmental Protection, Occupational Health, and Safety*. The document defines the core principles for ensuring environmental conservancy, protecting the health of employees and occupational safety.

Due to the implementation of this policy, OJSC Severneftegazprom ensures efficient and trouble-free operation of all production facilities and objects, implements a systematic approach to managing safety issues, and continuously improves activities in this area. In 2019, the Policy in the field of quality assurance, environmental protection, occupational health, and safety was updated.

In 2019, the Company introduced the requirements of the international standard in the field of operational safety management system ISO 45001:2018, on November 1, 2019, the certification audit of SMPs was successfully completed, there were no inconsistencies, the certificate of compliance was issued to a Company.

In accordance with the approved action plan for the implementation of the international standard in the field of road safety management system ISO 39001:2012, employees were trained and an evaluation audit of the system was conducted. Activities ensuring the implementation of the standard are carried out as scheduled.

The certification of the road safety management system is planned for December 2020.

* The policy in the field of quality assurance, environmental protection, occupational health, and safety is open and accessible to all shareholders on the Company’s website on the Internet (http://www.severneftegazprom.com).
THE CORE PRINCIPLES OF THE COMPANY’S ACTIVITIES IN THE FIELD OF PRODUCTION SAFETY:

- Leadership of the Company’s management in the industrial safety matters;
- Use of modern personal protective equipment;
- Active staff involvement in ensuring occupational safety and health;
- Application of best international practices and standards;
- Information availability and transparency;
- Informing contractors about norms, policies, and requirements in the field of occupational safety, monitoring implementation thereof;
- Preventive measures against industrial accidents;
- Compliance with laws, regulations, and other requirements;
- Improving of existing production processes, introduction of new safe technologies;

OCCUPATIONAL SAFETY

The health and life of employees, decent working conditions are the key priority for the management of OJSC Severneftegazprom. That is why the occupational safety management system is built in the Company in strict accordance with the requirements of Russian legislation and international standards.

The Company has created conditions under which the management system — for compliance with the requirements of international standard ISO 9001:2015, ISO 14001:2015, ISO 45001:2018, and the energy management system — for compliance with the requirements of international standard ISO 50001:2011. The integrated management system of OJSC Severneftegazprom was assessed and recertification of the integrated management system was conducted an audit in OJSC Severneftegazprom for the effectiveness of activities in the field of occupational and industrial safety as well as stimulate and maintain strict compliance with all the required safety standards and rules.

During the audit, the effectiveness of the management systems at OJSC Severneftegazprom was assessed and areas for improvement were identified. No inconsistencies recorded.

To increase the responsibility of personnel in matters of maintaining safety at the workplace and preventing injuries, the Company has introduced a procedure for conducting behavioral safety audits. Work in this area allow to detect and prevent hazardous activities of employees, evaluate the effectiveness of activities in the field of occupational and industrial safety as well as stimulate and maintain strict compliance with all the required safety standards and rules.

According to the 2019 results, 1,463 behavioral safety audits were conducted by authorized officers and specialists of the Company, while 48 hazardous conditions and staff actions were identified. The results of behavioral audits are analyzed, corrective and preventive actions are developed. Routine conduct of behavioral safety audits allows increasing the responsibility of work performers, reducing potentially dangerous conditions and staff actions, and as a result, having a positive effect on raising the safety level at the workplace as a whole throughout the Company.

</table>
Due to the use of this system by the Company’s employees, the Company introduced a system for monitoring the safety of hazardous working conditions at work, to increase the effectiveness of preventive work to prevent accidents and incidents. Actions aimed at eliminating the causes and preventing their recurrence were carried out.

Based on the results of the investigation of an industrial accident, the Company developed and carried out corrective measures. In 2018, corrective measures were taken aimed at eliminating the causes of an accident, the implementation of which ensures an integrated management approach to the safety of complex technological processes and reduces the risk of accidents and incidents.

The Company has a document outlining the principles for implementing the policy of OJSC Severneftegazprom in the field of industrial safety. The implementation of these principles ensures an integrated management approach to the safety of hazardous production facilities.

The Company has created a fire safety system, which includes a fire protection system, a set of technical devices, and a fire protection system. In accordance with the requirements of the legislation on fire prevention, a fire protection system, a set of technical devices, and a fire protection system are being developed for the Company’s hazardous production facilities.

The hazard analysis presents in the PLC. Training sessions are constantly held to work out the personnel’s knowledge and skills. The results of the assessment procedures represent a set of organizational and technical measures aimed at compliance with industrial safety requirements, prevention of accidents, and ensuring readiness to localize their consequences.

The Company timely provides information on the results of industrial control over compliance with industrial safety requirements for hazardous production facilities to the North Ural Department of the Federal Service for Ecological, Technological, and Nuclear Supervision.

In 2019, the 4th level of the CPC for Labor Protection and Industrial Safety conducted 6 checks: 4 target and 2 integrated. 99 violations were identified, which were eliminated in a timely manner. 9 hazardous production facilities (HPS) operate at the Company at present time. All of them have compulsory liability insurance for damage resulting from an accident or incident. In addition, all workers operating hazardous production facilities are certified in the field of industrial safety.

Plans for localization and liquidation of accident consequences (hereinafter referred to as “PLC”) have been developed for the Company’s hazardous production facilities. In accordance with the approved schedule, training sessions are constantly held to work out the situations presents in the PLC. The Company timely provides information on the results of industrial control over compliance with industrial safety requirements for hazardous production facilities to the North Ural Department of the Federal Service for Ecological, Technological, and Nuclear Supervision.

In accordance with the requirements of the legislation of the Russian Federation in the field of fire safety, the Company has created a fire safety system, which includes a fire prevention system, a fire protection system, a set of organizational and technical measures ensuring fire safety.
As part of the fire safety system at OJSC Severneftegazprom, the following main activities in the field of fire safety were performed in 2019:

- Ensuring compliance with fire safety requirements at the Company’s facilities and at leased areas of the forest fund;
- Development and implementation of fire safety measures by issuing (updating) local regulatory acts of the Company in the field of fire safety;
- Carrying out fire propaganda and training Company employees in fire safety measures;
- Maintenance of fire protection systems and means, including primary fire extinguishing means in good working order;
- Ensuring the activities of the corporate fire department for protecting the facilities at the Yuzhno-Russkoye Oil and Gas Field from fires;
- Monitoring compliance with fire safety requirements by employees of contracting organizations in places of residence and work at the Company’s facilities;
- Implementation of the volunteer fire department activities.

To ensure the fire safety for production facilities and implement the necessary regulatory requirements, the Company organized a corporate fire department (CFD). Its activities are aimed at preventing for ensuring fire safety, updating regulatory documents, monitoring compliance with fire safety requirements, and analyzing the implementation of fire prevention measures. During 2019, in accordance with the approved plans and schedules, a set of measures were taken to maintain the readiness of the unit, including participation in the development of an emergency response plan, firefighting plans, and fire-tactical exercises were held. The service is carried out at the posts and routes of patrols.

The management of the Company pays special attention to organizational and technical measures to ensure fire safety; for all facilities, instructions on fire safety measures have been developed (updated). The procedure for the organization and safe conduct of hot work at the Company’s facilities is regulated.

Seasonal maintenance of firefighting machinery, firefighting equipment, and tools is organized and is being carried out. Seasonal inspections were carried out for the water yield of the fire water supply systems of the Company’s facilities. High-quality and timely maintenance of fire-technical equipment and primary fire fighting equipment allows keeping them in good working order and continued readiness.

Maintenance and preventive maintenance of automatic fire extinguishing installations and fire alarms are carried out under an agreement by an organization licensed by EMERCOM of Russia for this type of activities. The Commission of the Company carries out quarterly performance checks of fire protection systems. All fire protection systems of the Company’s facilities are in working condition and comply with project documentation. In 2019, in accordance with the approved schedule and work plans, 8 meetings of the Fire Safety Commission were held. The results of work of the Fire Safety Commission are drawn up in relevant acts (8 acts), which reflect measures to improve and strengthen fire safety at the Company’s defense facilities (50 measures), as well as to create fire-safe working conditions, and define deadlines and responsible executors. Activities are carried out as scheduled.

To ensure readiness for use of primary fire extinguishing means (fire extinguishers), corporate fire department employees carried out repairs and reloading of 103 carbon dioxide and 235 powder fire extinguishers at the Company’s facilities.

During the year, 23 practical training sessions were conducted to organize the evacuation of people from buildings with a mass stay of people, during which assessments were made for the actions of personnel on duty. 53 classes on training in the fire-technical minimum were organized and conducted as a result of which 443 employees passed training and knowledge testing. Industrial control is carried out to ensure compliance by contractors with fire safety requirements when performing works or providing services at the Company’s facilities. During the year, 96 inspections of the fire safety condition at the places of residence for employees of contracting organizations, at the sites of construction and installation works on the territory of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field were carried out.

During the inspections, 259 violations of fire safety requirements were identified; according to the results of the inspections, 35 instructions for eliminating the revealed violations were prepared and presented. In 16 cases, contracting organizations were fined for a total of 12.4 million rubles, for violations of fire safety requirements during their work.

Work was organized to review the design and working documentation for the Company’s facilities for compliance with fire safety requirements. Constant monitoring is being conducted concerning the implementation of firefighting measures during the construction and commissioning of facilities.

On the basis of the corporate fire department, an emergency rescue unit of OJSC Severneftegazprom composed of 48 people, 46 of whom were certified as rescuers, was created and certified in the prescribed manner to conduct gas rescue and emergency rescue operations related to extinguishing fires. OJSC Severneftegazprom adopted the facility program “Ensuring Fire Safety in Leased Forest Areas for the Period 2017-2019”, approved measures for the spring-summer fire hazard period, determined the procedure for attracting forces a 1d funds to take measures to prevent the spread of forest fires. The program activities planned for 2019 have been fully implemented.

To promptly take measures to prevent the spread of forest fires on leased areas of the forest fund, a volunteer fire department was created in the Company. Volunteer firefighters received the required education and training.

In accordance with the requirements of forest development projects in the forest fund areas leased by the Company, fire prevention measures were taken, including the establishment of firefighting equipment concentration points, along the perimeter of objects, bordering the forest areas, laying of saline strips is carried out, and billboards on firefighting topics have been established within forest areas.

In the reporting period, no natural fires were registered on the territory of the OJSC Severneftegazprom licensed Area.

As part of the program implementation to achieve the goals and objectives of OJSC Severneftegazprom in the field of quality, environmental protection, industrial safety for 2019-2023, the required number of personal protective equipment for people in case of fires was calculated to equip the Company’s facilities, according to which it is planned purchase and placement of 423 units of personal protective equipment for people in case of fire at defense facilities for 2020. In 2019, an expert organization accredited by EMERCOM of Russia conducted an independent fire risk assessment (fire safety audit) of the Company’s facilities. The compliance of all facilities with fire safety requirements was confirmed, and positive conclusions were obtained.

FIRE SAFETY EXPENSES IN 2019 AMOUNTED TO 49,923 THOUSAND RUB
STAFF TRAINING AND TESTING

High production efficiency is only possible under the condition of continuous staff development and knowledge in the field of safe working methods since the efficient and trouble-free operation of equipment directly depends on the employees’ competence level. That is why OJSC Severneftegazprom organizes regular training in and testing its employees’ knowledge of labor protection and industrial safety. In the reporting period, vocational training and certification was carried out for working personnel in related professions and classes on the subject of obtaining permits required for the performance of certain types of work.

The number of managers and specialists who have passed knowledge testing on labor protection and certification according to the general rules of industrial safety and types of supervision is given in the table below.

It is important to note that training and assessing the Company employees’ expertise in the field of labor protection and industrial safety not only contribute to their professional and personal growth, but also ensure trouble-free, safe, and therefore stable and cost-effective functioning of all OJSC Severneftegazprom production facilities and objects.

HEADCOUNT AND PERSONNEL STRUCTURE

Investing in human capital is the basis for the sustainable development of OJSC Severneftegazprom in the future. The Company constantly strives to engage and retain qualified personnel aimed at achieving high results and development together with the Company, to form a team united by common aspirations and values. The personnel policy of OJSC Severneftegazprom harmoniously combines the professionalism and skill of experienced workers with the initiative of young professionals.

The operational activities of the Company are concentrated on the territory of the Yamal-Nenets Autonomous District, which is distinguished by a developed fuel and energy complex and a competitive labor market of highly qualified specialists. To ensure the production process at the facilities of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field, the shift method of organizing work is applied. This approach is the most common and appropriate in remote areas with difficult climatic conditions. The share of the shift workers of OJSC Severneftegazprom amounted to 60% (624 persons) in 2019.

We are fully aware of our responsibility to account the strategic objectives of the Company. The Company is working to engage and retain highly qualified employees and to create a personnel reserve taking into account the strategic objectives of the Company. OJSC Severneftegazprom is fully aware of its responsibility for ensuring trouble-free production activities, safe working conditions for workers and contractors as well as for maintaining the health of the population living in the regions where the Company operates. All this strengthens the team spirit, rallies employees and provides the Company with high product on results.

In total, 999 persons worked at the end of the year in the Arctic (196 women and 803 men).

The total headcount of employees at the end of the reporting period was 1,044 persons, the average headcount was 1,032 persons, which corresponds to the indicator for 2018 (1,032 persons).

The Company strives to create the most comfortable working conditions, which is reflected in the acceptable indicator of staff turnover for the reporting year — 3.88%. The calculation of the staff turnover rate is carried out in accordance with the practice that has been developed in the system of PJSC Gazprom.

The age distribution of OJSC Severneftegazprom employees is fairly even. The average age of employees is 42 years, youth under the age of 35 years — 241 persons, working pensioners — 135 persons.

As of the end of 2019, the overall staffing of the Company was 999 persons.

HUMAN RESOURCES / PERSONNEL MANAGEMENT

Personnel is a key factor in the efficiency and sustainable development of the Company; therefore, the most important process in managing human resources is the quality selection of qualified personnel. The development and implementation of the HR policy of OJSC Severneftegazprom are carried out by structural subdivisions under supervised by the Deputy General Director for Personnel Management. In their work, these structural subdivisions of the Company are based on compliance with the Constitution of the Russian Federation, the Labor Code of the Russian Federation, the Collective Agreement, and several internal regulations for labor relations. The Company builds partnerships with employees, creating all the conditions required for high professional achievements of employees, increasing their knowledge and skills, providing a comfortable and productive working atmosphere.

OJSC Severneftegazprom developed, introduced, and successfully implements a comprehensive program to improve the efficiency of human resource management for the period 2016-2020. According to it, the Company takes measures to form a competitive, highly professional, responsible, and united team. OJSC Severneftegazprom sets the following strategic goals in the field of personnel management:

- Providing the Company with qualified personnel;
- Maintaining a corporate culture;
- Improving organizational structure;
- Observing the most advanced international standards in the field of personnel management.

OJSC Severneftegazprom ensures equal opportunities for its employees and avoids discrimination on grounds of nationality, origin, gender, religion, and any other grounds. The Company’s management takes a strong line, which consists in the fundamental impossibility of using child, forced and compulsory labor for commercial purposes. Labor functions in the Company are performed in accordance with the concluded labor contract.

To maintain a healthy moral climate in the workforce and to avoid conflicts, the Company has mechanisms to prevent them by submitting requests via special feedback boxes and the “Question to Administration” e-mail address (Vopros@sngp.com). In the reporting period, there were no complaints about the practice of labor relations.

Professional skills competitions held in the Company regularly increase the prestige of workers and engineering specialties, popularize innovation, promote the dissemination of best production practices and strengthen the corporate culture.

In 2019, the Company hosted professional skill competitions for the title “Best in Profession” among electric gas welders, locksmiths in instrumentation and automation, and electricians. The total headcount of participants in the Best in Profession contests was 39 people.

The Company provides equal rights to women and men on maternity leave, which facilitates the hiring of qualified personnel, ensures the stability of the workforce, improves the morale of employees, and increases labor productivity. In accordance with Article 256 of the Labor Code of the Russian Federation, upon application by an employee of the Company, he/she is granted maternity leave until the child reaches the age of three years. Maternity leaves can be used in full or in part not only by the mother but also by father, grandmother, grandfather, another relative or guardian who actually looks after the child.

While on maternity leave, work may be continued on a part-time basis or at home on the grounds of an application from a woman or carer, while retaining the right to receive state social insurance benefits. For the period of maternity leave, the employee retains a place of work. In 2019, 6 people were provided with maternity leave, the rate of return to work after the end of maternity leave was 100%, the employee retention rate for 12 months after leaving the maternity leave was 40%.
PAYMENT FOR LABOR AND STAFF SOCIAL ASSISTANCE

Relations with staff are built on the grounds of the Collective Agreement, guaranteeing an equal approach to all employees.

Improving efficiency and productivity is one of the Company priorities. OJSC Severneftegazprom provides extended obligations in the field of social benefits and guarantees to motivate employees and achieve an optimal balance between work and rest, actively supports the health of employees, and tries to provide them with the proper conditions for comfortable and safe work.

The current Collective Agreement provides employees with reliable social support, which includes voluntary medical insurance, accident insurance, the organization of sanatorium and resort rehabilitation as well as other benefits and guarantees.

The Company is a responsible employer and provides its employees with decent wages. The Company uses two main systems of remuneration: time-bonus and time-individual. Workers employed in the Arctic are provided with higher tariff rates and official salaries.

An important component of nonfinancial motivation programs is the recognition of merit and achievements as an element of evaluating effectiveness. The Company has developed a system of individual labor motivation, including bonuses for achieving high results in work, as well as the following types of awards and rewards: Letter of appreciation, Letter of acknowledgment, Certificate of Merit, entering on Board of Honor, entry in the Book of Honor, the title of long-service employee of OJSC Severneftegazprom. The company promotes the scientific, technical, rationalization, and inventive activities of its employees by providing additional payments to the authors of rationalization proposals and patent rights. The Company respects the family responsibilities of employees: in accordance with the Collective Agreement, additional paid holidays and material assistance are provided in the event of registration of marriage and childbirth.

One of the competitive advantages of OJSC Severneftegazprom is the social policy pursued by the Company, which increases its attractiveness in the labor market. In order to engage and retain highly qualified personnel in the long run, OJSC Severneftegazprom regularly monitors the needs and problems of employees and tries to provide them with the proper conditions for comfortable and safe work.

The social policy of OJSC Severneftegazprom organically combines care for the young generation and employees who have merits for the Company. The Company has created conditions providing the organic process of replacing experienced employees with young specialists who have undergone the training required for the effective performance of professional duties.

The Housing Commission continues its work; subsidies are granted to employees in accordance with the Regulation on Reimbursement of Expenses to OJSC Severneftegazprom Employees for the Payment of Interest on Loans (Credits) for the Purchase or Construction of Residential Premises.

The Regulation on nonstate pension provision for employees of OJSC Severneftegazprom is in force. All retired employees of the Company on a well-deserved rest received support from the Company's pensioners.

The Re...
PERSONNEL DEVELOPMENT AND PERFORMANCE MANAGEMENT

Training and professional development of employees is one of the most important tasks for the Company. Against the backdrop of the rapid development of technologies and management systems, personnel training plays an increasingly important role in improving the Company efficiency and its competitiveness. Moreover, these activities bring positive results not only to the Company itself but also generally, have a significant impact on the level of training of specialists in the region — as OJSC Severneftegazprom is one of the largest enterprises in the Yamal-Nenets Autonomous District.

The Company's staff training is carried out as part of a comprehensive continuing education program. Training sessions and seminars are held mainly at the corporate training centers of PJSC Gazprom. In addition, employees have the right to use the educational services of leading domestic educational institutions.

OJSC Severneftegazprom identifies four main tasks of staff training:

- **Increasing the level of professional development**;
- **Creation of an effective personnel reserve planning system**;
- **Development of leadership and management competencies**;
- **Motivation to improve labor efficiency**.

The Company offers the following types of training: vocational training, advanced training, precertification training, and certification of employees; training in second (related) professions and internships. Employees can undergo various types of training with full or partial day release, without disrupting the process flow.

**THE TOTAL NUMBER OF EMPLOYEES PARTICIPATING IN CONTINUING EDUCATION PROGRAMS IN 2019 WAS 373 PEOPLE**

In the reporting period, the total time for training and professional development of employees exceeded 32 thousand hours. This indicator characterizes the desire of the Company's management to improve the level of theoretical knowledge and practical skills of its employees. Training at leading training centers makes OJSC Severneftegazprom an appealing and socially responsible employer.

For the purpose of continuing education and performance improvement, support and development of staff scientific and technical activities, the Company adopted a new version of the Grant Regulations in 2019. They are provided for the education of employees of OJSC Severneftegazprom in graduate and doctoral studies at Russian higher educational institutions and scientific organizations.

The Company pays considerable attention not only to the development of professional skills but also to the assessment of the employee qualifications. The Company has a performance management system based on an assessment of the level of professional competencies, key performance indicators, and individual development goals of employees.

The performance of managers and specialists is evaluated annually, starting in 2008. Its main tasks are:

- **Planning and organization of learning processes**;
- **Improvement of work on the selection and formation of a personnel reserve**;
- **Disclosure of creative potential and the most effective use of professional experience of employees**.

The evaluation results are also used to develop proposals for the revision of wage levels and adopt other organizational decisions.

The automated annual interview program is used to reflect the results of employee evaluations. The activities of employees are evaluated by the following parameters:

- **Organization and diligence**;
- **Responsibility, discipline**;
- **Independence and initiative**;
- **Ability to learn new information**;
- **Competence**.

450 managers and specialists of the Company were interviewed in 2019. Following the assessment, a decision was made to include 102 employees of the Company in the continuing education plan and send them for training.
FORMATION OF A PERSONNEL RESERVE AND WORK WITH YOUNG SPECIALISTS

The Company forms and develops an internal personnel reserve to ensure long-term HR robustness. The company systematically works on the professional and personal growth of young specialists, their promotion to key managerial positions and involvement in innovative, research, and project activities.

The formation of a personnel reserve allows identifying and training talented employees to maximize the use of their potential in achieving the Company’s strategic goals and to retain the best employees by providing them with career opportunities and development.

The practice of transferring promising young employees, with managerial potential, to the reserve for filling the posts of heads of structural subdivisions is expanding.

The main tasks of working with personnel reserve are:

- systematic and comprehensive development of professional and managerial competence of employees;
- development of business and personal qualities;
- increase in labor performance;
- development of motivation for further career growth.

Employees included in the personnel reserve undergo targeted training within the framework of the current system of continuing corporate professional education with the involvement of teachers from leading higher educational institutions of the Russian Federation and foreign countries as well as through self-education. Work with people included in the personnel reserve is based on individual planning of term and types of training.

An important stage of the work with employees enlisted in the personnel reserve is establishing individual training plans ensuring that young specialists acquire the required theoretical and practical knowledge, grasp the content and essence of managerial activities. All goals of the plan shall comply with the requirements of the SMART-system*.

The Company updates the personnel reserve lists systematically (at least once a year). The reserve composition is reviewed and updated in the course of annual analysis of the arrangement of managers and specialists. At the end of the year, the performance of each candidate enlisted in the personnel reserve is evaluated.

In 2019, 5 employees in the personnel reserve transferred to senior management positions; 9 employees underwent advanced training in corporate educational institutions of Gazprom PJSC and leading higher educational institutions of the Russian Federation.

Within the efforts to form and develop the personnel reserve, OJSC Severneftegazprom pays considerable attention to working with young specialists who are university graduates, ensuring their career growth through involvement and adaptation in research and production activities. Young people are involved in the team by providing decent working conditions and supporting their desire for professional development. The Company offers its employees numerous options of supporting their desire for professional development.

In the reporting period, the share of young workers under the age of 30 was 8%, or 82 people, of the total number of employees. Initiative and talented young employees open up prospects for stable work and further growth for the Company.

Training and promotion of personnel, ensuring the continuity of management, operational rotation are among the strategic areas of the Company’s personnel policy.

HEALTH PROTECTION

Living in the difficult climatic conditions of the Arctic requires special care for the health of employees, therefore medical care for staff is one of the priority areas of the social policy of the Company. Ensuring the quality and accessibility of medical services is an integral part of the health system for employees of OJSC Severneftegazprom. The program of voluntary medical insurance (VMI) implemented in cooperation with the SOGAZ insurance group gives all employees of the Company the opportunity to receive modern quality medical care, which is of particular importance in the Arctic region. The VMI contract provides for the following services:

- Outpatient medical care in clinics equipped with advanced medical technologies and modern equipment for diagnosis and treatment;
- Inpatient care;
- Health resort and rehabilitation treatment.

Medical care for employees under the contract is carried out in more than 6,000 clinics and health centers institutions of the Russian Federation. In 2019, 156 employees of the Company received outpatient care using modern instrumental and laboratory examination methods. 68 employees of the Company were sent to the leading specialized clinics and research institutes of the Russian Federation for additional examination and treatment using high medical technologies and unique treatment methods. The list of the most famous clinics in the Russian Federation: Botkin State Clinical Hospital (Moscow), Bakulev National Medical Research Center for Cardiovascular Surgery (Moscow), Federal State Budgetary Institution National Medical Research Center for Cardiology of the Ministry of Health of the Russian Federation (Moscow), State Budgetary Health Institution Republican Cardiology Center (Ufa), Tyumen Cardiology Clinic under the Directorate of the President of the Russian Federation (Moscow), Herzen Medical Center (Moscow), S.N. Fedorov NMIRC MNTK Eye Microsurgery, National Medical Research Center of Traumatology and Orthopedics named after N.N. Piorov, etc.

This year, the Company’s employees were provided with expensive types of medical services, such as cardboardical surgical interventions, arthroscopic surgery to restore joints, surgery for cancer patients and their further treatment, etc. In addition, the Company pays attention to employees with disabilities (disabled). Several times
a year at the expense of voluntary medical insurance funds, this category of employees is treated in specialized clinics outside the Arctic. In 2019, a modern hearing aid was purchased for a disabled employee of the Company.

The priority area for the Company is the health improvement of personnel in sanatorium institutions of the Russian Federation. In 2019, 537 employees of the Company and 43 nonworking pensioners received the social benefit for rehabilitation and rehabilitation treatment at the expense of the voluntary medical insurance contract.

In addition, 74 workers with pathologies of the locomotor system, nervous system, and metabolism were sent for treatment abroad — to the People's Republic of China.

At any time of the day, gas industry workers can ask for medical help at the health center of the rotation camp of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field equipped with the necessary equipment and medicines. The main functions of the health center include: providing first aid, prevention of injuries, infectious, and viral diseases, conducting medical examinations.

In accordance with the legislation of the Russian Federation and to prevent occupational diseases, all employees undergo medical examinations annually based on the approved lists “Positions and Jobs Subject to Preliminary and Periodic Medical Examinations at OJSC Severneftegazprom”. During the reporting period, 840 employees of the Company underwent a periodic medical examination. Occupational diseases were not detected according to the results of medical examinations in the reporting period.

A major role in maintaining the health of employees is played by prevention, as a priority in the development of healthcare in the Russian Federation.

In 2019, the Company successfully implemented four preventive programs:

- “Healthy Heart” program for the prevention of diseases of the cardiovascular system;
- Cancer prevention program;
- Prevention of acute respiratory viral infections, influenza, and measles;
- Program to reduce overweight “Healthy Weight is Great!”

100 employees expressed a desire to participate in the Preventive and Healthy Lifestyle Programs. 445 workers were vaccinated against influenza and measles to avoid outbreaks of infectious diseases.

In 2019, the Company launched the “Step-Towards” program for disabled children of the Company's employees for the first time. Rehabilitation treatment in specialized medical centers of Russia was organized for 4 children.

The involvement of personnel in preventive programs allows for timely diagnosing diseases of the cardiovascular system, oncopathologies, and preventing an increase in mortality.

Every year, a lesson is held for the Company’s employees on the methods of providing first medical treatment. The lesson is organized by specialists of the medical service of OJSC Severneftegazprom to explain in an accessible form the importance of timely first aid and teach the basic methods of saving a person’s life in emergencies. In 2019, 1,020 employees of the Company were trained in the methods of providing first pre-medical care.

A single integrated approach to the organization of work and leisure, preserving the health and working capacity of the team allows OJSC Severneftegazprom to cope successfully with production tasks.

A single integrated approach to the organization of work and leisure, preserving the health and working capacity of the team allows OJSC Severneftegazprom to cope successfully with production tasks.

DEVELOPMENT OF PHYSICAL EDUCATION AND SPORTS

The pro motion of a healthy lifestyle, the popularization of physical education and sports are tasks of a state scale and importance.

The company confidently carries out its activities according to the concept of social responsibility of business to society. OJSC Severneftegazprom contributes to solving the tasks of the state by developing sports infrastructure in the regions of its activities and supporting various public undertakings, teams, and sports sections.

This is especially important when you consider that OJSC Severneftegazprom operates in the Arctic region, where the base for playing sports is less developed, the possibilities for improving it without the help of business are limited, and harsh climate conditions make regular sports a necessity. Such activities not only help to improve the level and quality of life of the population of the regions where OJSC Severneftegazprom operates and form a positive image of the enterprise in the eyes of people but also help to establish close and fruitful interact on with representatives of local authorities.

In 2019, representatives of OJSC Severneftegazprom participated in several sporting events. The Company’s team took part in the Open Championship of Novy Urengoy in futsal among men’s teams of SUPER LEAGUE, the Open Volleyball Championship of Novy Urengoy (Amateur Volleyball League), the ski race “Skitrack of Russia,” Arctic Charity Volleyball Tournament “Yamal Governor’s Cup,” “Yaha-Marathon” kayaking races, “Winter Fishing” competitions, a volleyball tournament and “Sports Day” competitions dedicated to the Oil and Gas Industry Day, a bowling tournament, paintball competitions among the Company’s employees, the Open Workers’ Games of LLC Gazprom Barene, the “Fishing” competitions, the Yama Marathon competitions, the Open Championship in Rapid Chess of LLC Gazprom Dobycha Urengoi, a climbing tournament of LLC Gazprom Dobycha Noyabrsk, a billiards tournament in Moscow for the Cup of the Chairman of the Management Committee of PJSC Gazprom, a bowling tournament for children of the Company’s employees and a bowling tournament for the Company employees, a charity tournament “Do a Good Deed,” a billiards tournament of LLC Gazprom Dobycha Yamburg. In 2019, OJSC Severneftegazprom held the Spartakiad dedicated to the 50th anniversary of the discovery of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field. Managers and employees of the Company competed in eight sports: skiing, swimming, darts, water polo, billiards, volleyball, paintball, and trap shooting. The Company rented sports halls for volleyball, futsal, billiards, bullet shooting, and table tennis in Novy Urengoy.

In order to strengthen the corporate spirit, promote a healthy lifestyle and team cooperation, the youth team of OJSC Severneftegazprom took part in the recreational sports outdoor extreme race “Champions Race 2019.”

Activities to promote physical education and sports bring tangible benefits to the Company itself. Only a healthy and energetic employee can be truly efficient, proactive, and responsible at work at their workplace; therefore physical education and sport play an important role in maintaining the physical and moral health of employees of OJSC Severneftegazprom. The Company has successfully carried out activities aimed at involving the Company’s employees in systematic physical education and sports, raising the level of the relevant material base and infrastructure at the Company’s facilities. There is a fitness center on the territory of rotation camp of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field, which includes a modern gym, a multi-purpose sports hall, a swimming pool, and a sauna, premises for fitness, table tennis, and billiards. Here, competitions in volleyball, football, basketball, swimming, athletic triathlon, and other sports are held regularly.

Besides, in accordance with the Collective Agreement, employees of the Company operating outside the gas industry are paid compensation for the cost of attending individual sports classes at actual costs (not more than 0.5 of the minimum tariff rate per month).
Interaction with stakeholders

An open dialogue with stakeholders creates the conditions for increasing business efficiency, makes it possible to achieve high results, and produces a strengthened image of the Company. In the course of regular interaction with stakeholders, it becomes possible to coordinate and concentrate the efforts of the Company on achieving common goals in sustainable development.

The high reputation of a reliable and effective partner in Russian and international business circles, authority and respect in society — all these advantages are not easy to evaluate in financial terms.

However, in the modern world, where information openness and public trust are the most important condition for stable and dynamic business development, they become an urgent need for any successful company.

Sustainable development of OJSC Severneftegazprom is inextricably linked with maintaining a long-term partnership with the regions where the Company operates and interacting with stakeholders, based on the following principles:

- Identification of expectations of stakeholders and compliance with commitments;
- Respect for interests and mutually beneficial cooperation;
- Timely informing about changes and main aspects of the Company.

The Company identifies a number of key groups of stakeholders whose interests are most tangibly associated with its activities and who, in turn, can have the most significant impact on the Company's ability to implement its strategic goals:

- Shareholders;
- State authorities;
- Local communities;
- Partners and suppliers;
- Mass media;
- Nonprofit organizations and municipal institutions;
- Personnel.

The stakeholders are identified and selected for interaction based on their geographical location and the regional aspect. Representatives of the parties that are subject to possible impacts as a result of the production and business activities of the Company are identified by territorial affiliation with the areas of production activity of the Company, namely: Yamal-Nenets Autonomous District, the Krasnoselkup and Purovsky Districts, Novy Urengoy.

The range of issues for dialogue with stakeholders is formed on the basis of constant analysis of the internal and external social environment. Such work is carried out systematically taking into account the short-term and long-term plans of the Company. The main objective of the interaction is to find a solution that satisfies the majority of stakeholders, provided that it complies with the provisions of the law and other applicable requirements.

SHAREHOLDERS

The Company shareholders are the most significant group of stakeholders. Following the best international practices, OJSC Severneftegazprom builds relationships with shareholders and their representatives based on the principles of openness, information transparency, and protection of their rights and legitimate interests. The main forms of such interaction are the holding of shareholders' general meetings where the most important issues of the Company's activities are submitted for discussion and the information on the Company's activities is presented at shareholders' request.

In accordance with the Articles of Association of OJSC Severneftegazprom, the shareholders participate in the management and control of the Company's activities through the existing management bodies: General Meeting of Shareholders, Board of Directors, Technical Committee as a consultative and advisory body to the Board of Directors.

SUSTAINABLE DEVELOPMENT

102-43,102-44

STATE AUTHORITIES

Being a socially responsible Company that complies with environmental and social standards, OJSC Severneftegazprom seeks to promote the development of the territories of its activities. The Company is building a constructive dialogue with public authorities in order to comply with all established legislative procedures and to facilitate the solution of socially significant problems. The work of the Company in this direction is carried out on the basis of the Public Consultation Plan.

Relations with the regions are regulated by the General Cooperation Agreements concluded between the Company and the municipal administrations of the Krasnoselkup and Purovsky Districts, Novy Urengoy, and with the Government of the Yamal-Nenets Autonomous District.

The regional policy of OJSC Severneftegazprom is based on the implementation of the following measures:

- Investments in infrastructure and social sphere;
- Reporting on the Company’s activities to supervisory authorities;
- Employment of the local population;
- Tax liabilities;
- Implementation of projects for the development of local communities, socially significant and environmental projects;
- Assistance to charities;
- Disclosure of information on the Company’s activities on a corporate website on the Internet.

In 2019, under the cooperation agreement between the Government of the Yamal-Nenets Autonomous District and OJSC Severneftegazprom for 2018–2020 dated December 21, 2017, and annual supplementary agreements, the amount of the Company’s financing measures in the field of socioeconomic development of the territory of the Yamal-Nenets Autonomous District amounted to RUB 60 million.

SUPPORT OF INDIGENOUS POPULATION

OJSC Severneftegazprom implements programs aimed at supporting the traditional way of life of the peoples of the North, preserving a unique culture, and at the same time, adapting them to modern economic and social trends.

LOCAL COMMUNITIES

OJSC Severneftegazprom builds its relations with local communities in the regions where the Company operates on the principles of respect and equality.

Support of social programs and charities, solving economic and environmental problems in the regions where the Company operates are among the most important components of Severneftegazprom regional policy contributing to a constructive dialogue with the public.

Interaction with local communities is regulated by the General Cooperation Agreement as well as by collecting data via the feedback boxes at the offices of OJSC Severneftegazprom. Of particular interest to the population of the North are the provision of financial assistance in the framework of existing agreements or by appropriate appeals to the Company.

Responsibility for fulfilling obligations under the agreements and for implementing charity events with local communities on the grounds of received applications is assigned to the PR service of OJSC Severneftegazprom. During 2019, all measures to finance socioeconomic development and preserve traditional household management of the indigenous minority peoples of the North were carried out in full and within the time stipulated by the cooperation agreements.

The programs implemented by OJSC Severneftegazprom are aimed at supporting the traditional way of life of the peoples of the North, preserving a unique culture, and at the same time, adapting them to modern economic and social trends. The Company strives not only to ensure that cultural traditions and lifestyles of indigenous minority peoples are preserved but also to protect their minority peoples minority rights and interests (related to land, other relevant resources, etc.).

PARTNERS AND SUPPLIERS

The procurement policy by OJSC Severneftegazprom is implemented primarily on a competitive basis to ensure that contractors for supply of works, services, and goods required for timely and high-quality satisfaction of the Company’s needs are selected optimally. Tenders carried out in accordance with the corporate regulations.

During the reporting period, the Company carried out 942 procurement operations, totaling more than RUB 25.5 billion. Procurement from local suppliers and contractors registered in the Yamal-Nenets Autonomous District accounts for 8% of the total amount of purchases. Percentage of competitive procedures from the total volume of the Company procurements for 2019 is 97.64%. The total reduction in contract prices for the total volume of the Company procurements for 2019 amounted to more than RUB 800 million.

The Company interacts with suppliers based on the principles of business ethics and a transparent and competent selection mechanism. When working with contractors, OJSC Severneftegazprom is guided by the requirements established in the Company in the field of labor protection, industrial safety, and environmental protection.

from adverse impact in the process of carrying out its production activities. Due to the territorial remoteness of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field from the habitats of the indigenous peoples of the North, the Company’s activities do not entail any impact on indigenous minorities, including the need for their resettlement in other regions. Thus, there are no cases of involuntary resettlement, both in terms of forced physical movement, and in relation to the violation of the economic situation (loss of assets or access to resources) of households and representatives of local communities.

There were no disagreements with local communities and indigenous peoples related to the current or planned future activities of the Company, as well as incidents involving any degree of infringement of indigenous peoples minority rights and interests (related to land, other relevant resources, etc.).

MASS MEDIA

The mass media play an important role in forming and maintaining a positive image of the Company and strengthening its business reputation. A well-built strategy of information interaction with the mass media allows timely informing the public about the Company’s activities.

The main tasks of the Company’s communications with the mass media:

- developing dialogue with an external audience;
- information support of the Company’s activities in the regions where it operates;
- promotion of the Company’s image.

In 2019, OJSC Severneftegazprom published materials in federal, regional, and municipal mass media, the Company’s corporate publications, press releases, and informational messages were posted on the Company’s website on the Internet and on the corporate portal of the Company, and videos about social and production events were published in electronic media.

The Company organizes regular press tours to the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field facilities for mass media representatives to inform the stakeholders.

One of the main channels of information disclosure is the corporate website of OJSC Severneftegazprom on the Internet, which provides information on its production and financial activities, sustainable development, and corporate responsibility. The Company conducts regular updates of the website, endeavoring to make it the maximum informative and user-friendly. In 2019, 407 informational messages and press releases were posted on the official website and corporate portal of the Company.
CARE OF THE INDIGENOUS POPULATION

OJSC Severneftegazprom implements programs in the region of operation based on respect for the culture and traditions of peoples of the North and support for their adaptation to the modern social and economic conditions.
NONPROFIT ORGANIZATIONS AND MUNICIPAL INSTITUTIONS

OJSC Severneftegazprom implements large-scale investment programs in the social infrastructure of the regions where it operates and provides targeted assistance to nonprofit organizations and institutions.

In 2019, in the framework of a cooperation agreement between the Government of the Yamal-Nenets Autonomous District and OJSC Severneftegazprom, financial assistance was provided in the amount of RUB 60 million, dedicated to:

- Socioeconomic development of the Krasnoselkup District municipality;
- Socioeconomic development of the municipality of Novy Urengoy;
- Social and economic development of the municipality of Purovsky district;
- Organization of medical and diagnostic assistance to critically ill children and children with disabilities of the Yamal-Nenets Autonomous District;
- Maintenance and conduct of the statutory activities of Yamal-Nenets Autonomous District Hockey Federation, a regional public organization;
- Carrying out the statutory activities of Nonprofit Organization Regional Innovation and Investment Fund “Yamal”.

PERSONNEL

The interaction between OJSC Severneftegazprom and the personnel is based on respect for the personality and rights of employees and is governed by local regulations and the Collective Agreement of the Company.

The main mechanism for developing a dialogue with employees is the system of internal corporate communications. Employees can obtain information about the Company’s development plans, opportunities for their professional and career development during corporate events as well as by sending questions via the feedback boxes at the Company’s offices or via the contact center of OJSC Severneftegazprom (Vopros@sngp.com, telephone: +7-3494-932-932). In 2019, the management of the Company received no complaints.

Employees of the Company can discuss, by prior appointment, personal issues both with a Deputy General Director and directly with the General Director. There were complaints submitted by the Company’s employees, concerning the activities of OJSC Severneftegazprom related to environmental aspects and environmental protection, occupational health and safety.

Besides, any employee can address any question to the relevant subdivision or to the Company management, as well as make a proposal to optimize work processes on the corporate portal of the Company.

OJSC Severneftegazprom organizes regular cultural and sporting events, in their diversity, aimed at strengthening the team spirit and team building.
THE CORPORATE MANAGEMENT SYSTEM OF OJSC SEVERNEFTEGAZPROM IS DEVELOPED IN ACCORDANCE WITH THE BEST RUSSIAN AND INTERNATIONAL PRACTICES AND STANDARDS.
FINANCIAL AND OPERATIONAL ACTIVITIES MANAGEMENT AND SUPERVISION BODIES

EFFECTIVE CORPORATE MANAGEMENT SYSTEM OF THE COMPANY IS THE GUARANTY FOR THE SHAREHOLDERS INTERESTS PROTECTION.

CHARTER DOCUMENTS AND THE SHAREHOLDERS AGREEMENT OF OJSC SEVERNEFTEGAZPROM ENSURE THE RIGHT OF SHAREHOLDERS TO PARTICIPATE IN THE COMPANY MANAGEMENT.

IN 2019 THERE WERE HELD:

3 GENERAL MEETINGS OF SHAREHOLDERS

10 MEETINGS OF THE BOARD OF DIRECTORS

7 MEETINGS OF THE TECHNICAL COMMITTEE

The structure of financial and operational activities management and supervision bodies

THE GENERAL MEETING OF SHAREHOLDERS is the supreme management body of the Company, through which shareholders exercise their right to participate in the management of the Company.

THE BOARD OF DIRECTORS is a management body that exercises general management of the Company and is responsible for strategic management aimed at fulfilling long-term goals and objectives, as well as monitoring the performance of the Company.

The Articles of Association of OJSC Severneftegazprom are available for review to all stakeholders on the Company’s website at www.severneftegazprom.com.
Three General Meetings of the Company Shareholders were held in 2019, including the Annual General Meeting of Shareholders (June 4, 2019) where the Annual Report and Annual Financial Statements for 2018 were approved, and the Auditor of the Company was selected, the Board of Directors and the Revision Commission were elected, and also the distribution of profits and the payment of remuneration to the members of the Board of Directors ware discussed.

At the Extraordinary General Meeting of Shareholders on June 28, 2019, decisions were considered and adopted on issues of consent to executing supplementary agreements to the long-term gas supply contracts with regard to setting the gas selling price for the second half of 2019 of the Supply Year, which were interested-party transactions.

At the Extraordinary General Meeting of Shareholders held on September 23, 2019, convened at the request of Gazprom PJSC, the new Board of Directors and the Revision Commission of the Company were elected.

In accordance with the Articles of Association of OJSC Severneftegazprom, the Board of Directors of the Company is composed of 8 members.

In the reporting year, 10 meetings of the Board of Directors were held, at which 37 issues were considered in various areas of the Company.

The Board of Directors focused on important issues related to the general management of the Company’s activities related to:

- Coordination of interested-party transactions, including the issue of determining the price of property that is the subject of these transactions in accordance with Article 77 of the Federal Law on Joint-Stock Companies;

Prepare the holding and convening of an Extraordinary General Meeting of Shareholders and the Annual General Meeting of Shareholders, including preliminary approval of the Annual Report, recommendations on the amount of dividends on shares of the Company, and the procedure for their payment;

**Technical Committee**

The Company has established a Technical Committee under the Board of Directors, the purpose of which is the preliminary consideration of significant technical issues of the Company’s activities that are within the competencies of the Board of Directors and provide recommendations for the latter to make decisions on such issues.

The procedure for the formation and activities of the Technical Committee is regulated by the OJSC Severneftegazprom Shareholders Agreement and the Regulation on Technical Committee approved by the Board of Directors.

The Technical Committee is composed of 8 members appointed by the Board of Directors. Candidates are nominated by the shareholders of the Company in the following order: 4 candidates from PJSC Gazprom, 2 candidates from Wintershall Dea GmbH and OMV Exploration and Production GmbH — 2 candidates from each company.

The function of the Technical Committee is to provide recommendations to the Board of Directors on all significant technical issues — within its competencies — of Company’s activities, including the approval of the Long-Term Development Plan and the Budget, the Draft Additional Plan for the Field Development, the Additional Plan for the Field Development, and the Annual Work Program and Budget as well as any amendments and/or supplements thereto.

The activities of the Technical Committee composed of the members with extensive experience and knowledge in special fields increase the efficiency and quality of the work of the Board of Directors and, as a result, create effective mechanisms for managing the Company’s activities.

Members of the Technical Committee do not own shares of the Company. There were no transactions on the acquisition or alienation of the Company’s shares by members of the Technical Committee in the reporting year.

**COMPOSITION OF THE TECHNICAL COMMITTEE**

**AS OF THE END OF THE REPORTING PERIOD:**

DESCRIPTION OF THE INTERNAL RISK CONTROL ENVIRONMENT IN THE COMPANY

The Company has the following regulatory documents in the field of risk management and internal control:

- the documented procedure IMS DP 08 "Risk and Opportunity Management in the Environmental Management System" rev. 4 was developed and implemented in 2019;
- the documented procedure ISM DP 09 "Risk Management in the Quality Management System" rev. 1 was developed and implemented in 2019;
- the Risk Assessment Methodology, rev. 1 was developed and implemented in the quality management system in 2019;
- the Regulation on pre-trial and claim work in the Company, rev. 1, was developed and implemented in 2017;
- the Regulation on the procedure for working with the control (supervision) bodies when they carry out inspections in the Company, rev. 3 was developed and implemented in 2017;
- the regulation on the procurement of goods, works, and services, rev. 6, was developed and approved in 2018.
- the Regulation on contractual work in the Company, rev. 5, was developed and implemented in 2019;
- the Methodology for Estimating Expected credit losses, rev. 1 was developed and implemented in 2019.

The Company has the following regulatory documents in the field of risk management and internal control:
Industry risk

The Company is exposed to industry risks in carrying out its activities, the most important of which are hydrocarbon prices and technological risks associated with the specifics of the production process. Search for and development of the fields, preparation, and transportation of gas are complex and capital-demanding processes that entail technological and environmental risks. The Company minimizes these risks strictly observing industry requirements and standards, introducing new technologies and equipment at all stages of the production process.

RISK OF A DECREASE IN SALES

The risk of a decrease in sales is associated with a likely decrease in hydrocarbon demand in the long term, which in turn, may have an adverse effect on the project performance. However, in accordance with long-term gas supply contracts, the buyer pays for the entire volume of contracted gas, regardless of the actual withdrawal, which eliminates this risk for the Company until the expiration of these agreements.

RISK OF SIGNIFICANT CHANGES IN GAS MARKET PRICE

A significant reduction in the market price may affect the cash flows required for the implementation of stable production and business activities of the Company. The risk is assessed as low since in accordance with the Gas supply contracts the gas price is determined by the formula, which takes into account the expenses of the Company and the required rate of return.

RISKS ASSOCIATED WITH THE LICENSE VALIDITY

The Company carries out its activities in the development of the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field in accordance with licenses for the right to use subsoil and to carry out other licensed activities. The Company fully complies with the requirements of the license agreements and takes all actions required to comply with the current legislation in the field of licensing in order to minimize this risk.

RISKS ASSOCIATED WITH ENVIRONMENTAL POLLUTION

The Company’s activities in developing the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field are potentially associated with the risk of environmental damage. However, existing design solutions, high-tech equipment used, production control at all stages of production activities, including close interaction with contracting organizations operating on the territory of the Company and the absence of emergencies, allow maintaining a low level of environmental damage.

TECHNOLOGICAL RISKS

Operational activities of the Company at the Yuzhno-Russkoye Oil, Gas and Gas Condensate Field may entail the impact of adverse factors associated with equipment failure.

At the same time, the technologies used in the production, preparation and transportation of gas comply with modern requirements for reliability and safety in the operation of equipment, which helps to minimize these risks.

Certified equipment and technical devices that meet the modern requirements of reliability and safety during their operation are used at hazardous production facilities of the field. Equipment and machinery undergo timely maintenance by the personnel of the Company or specialized organizations, which also reduces these risks.
RISKS ASSOCIATED WITH INFLATION

At the end of 2019, the inflation rate was 3%. The Ministry of Economic Development of the Russian Federation predicts inflation growth to 3.8% in 2020. At the same time, inflation will not have a significant impact on the financial and economic performance of the Company in the foreseeable future in connection with the established mechanism for pricing gas sales, as well as the cost-cutting program implemented by the Company.

CREDIT RISK

Credit risk, namely the risk of default on obligations by buyers of natural gas, is assessed as low. The buyers of natural gas are Gazprom Group companies. They established themselves as reliable partners that do not allow delays in payment for completed deliveries.

LIQUIDITY RISK

The principle of ensuring liquidity. A high unevenness of certain types of cash flows generates a temporary shortage of funds of the enterprise, which can have a significant impact on the level of its insolvency. In 2019, profitable payments were received evenly; there was no need for borrowed capital of the Company.

The principle of reducing the risk of liquidity loss by the Company. The Company’s revenue is determined by the expenses included in the price formula. In the event of a decrease in existing gas production, cash flows will not suffer due to an increase in unit prices commensurate with a decrease in production. The gas pricing mechanism significantly reduces the risk of loss of liquidity of the Company.

RISKS ASSOCIATED WITH THE ENFORCEMENT OF THE TAX LEGISLATION BY TAX AND JUDICIAL AUTHORITIES OF THE RUSSIAN FEDERATION

Over the past years, there has been a tendency to introduce amendments and additions to the tax legislation, thereby preserving the risks of the possibility of changes in the Tax Code of the Russian Federation that could have an impact on the Company’s activities.

To avoid tax risks and timely adapt the Company’s activities, changes made to tax legislation are regularly monitored, law enforcement practice is studied, and interaction with state authorities is carried out.

RISKS ASSOCIATED WITH THE APPLICATION AND POSSIBLE AMENDMENT OF THE ENVIRONMENTAL LEGISLATION OF THE RUSSIAN FEDERATION

The production and business activities of the Company are largely associated with environmental impact, therefore noncompliance with environmental legislation or failure to respond promptly to changes made to it may entail adverse consequences of legal, financial, and reputation nature.

Recognizing the importance of preserving the environment, the safety of production activities and the fulfillment of environmental obligations, the Company regularly monitors changes in legislation in the field of environmental protection and the conservation of natural resources, monitors compliance with legislation, the availability and sufficiency of effective regulatory and permitting documents, and timely and correct compliance with prescriptions of supervisory bodies.

RISKS ASSOCIATED WITH LITIGATION AND RESTRICTIONS ON THE COMPANY’S ACTIVITIES

At the moment, the Company does not participate in significant litigations and is not liable for the debts of third parties, which may result in a restriction of the Company’s activities.

The Company seeks to resolve disputes in the framework of pretrial procedures by monitoring judicial practice on issues related to the activities of the Company, as well as the rules of court proceedings.

<tr>
<td>2.2</td>
<td>The competencies of the Board of Directors is established by the Articles of Association of OJSC Severneftegazprom and the Regulation on the Board of Directors of OJSC Severneftegazprom (approved by the General Meeting of Shareholders on November 2, 2009, Minutes № B/2009).</td>
</tr>
</tbody>
</table>
2.3 In accordance with the Articles of Association of OJSC Severneftegazprom, the competencies of the Board of Directors include the election of the General Director and the termination of his/her powers.

2.4 The Board of Directors annually approves the Annual Program and Budget of the Company for the coming year. The competencies of the Board of Directors also include determining the priority areas of the Company’s activities, approving long-term plans and investment programs of the Company’s activities as well as amendments to the current Long-Term Development Plan and Budget of the Yuzhno-Russkoye Oil and Gas Field.

2.5 The Annual Report discloses information on the number of meetings of the Company Board of Directors held over the past year, as well as information on the most significant issues on the agenda considered by the Board of Directors.

2.6 The shareholders of the Company have the opportunity to send written requests to the Chairman of the Board of Directors on issues within the competence of the Board of Directors, as well as to communicate their position to him through the office of the Chairperson of the Board of Directors and through the Company’s subdivision the task of which is to interact with shareholders.

2.7 The Board of Directors does not include persons who are participating in a legal entity competing with the Company, holding positions in its executive bodies or are its employees.

2.8 Candidates nominated to the Company Board of Directors submit information on how each member of the Board of Directors voted on the items on the meeting agenda.

2.9 All decisions of the Board of Directors are made with taking into account the compliance with the environmental and social standards adopted by the Company that meet international standards — ISO 14001: 2015 Environmental Management System; requirements of the Federal Law on Joint-Stock Companies; the Committee and the termination of their authority falls within the competence of the Board of Directors.

2.10 The company provides the members of the Board of Directors with the information necessary for the effective fulfillment of their duties in preparation for meetings of the Board of Directors (including information in English), as well as additional information upon request of members of the Board of Directors.

2.11 The Articles of Association of OJSC Severneftegazprom provides for the possibility of holding meetings of the Board of Directors both in presentia and in absentia, as well as the possibility to take into account a written statement by a member of the Board of Directors who is absent from the meeting in presentia — to determine the quorum and voting results.

2.12 The minutes of the meeting of the Board of Directors shall contain information on how each member of the Board of Directors voted on the items on the meeting agenda.

2.13 Meetings of the Board of Directors are held in accordance with the approved work plan, and also, as necessary, at least once every two months as a rule.

2.14 The Articles of Association of OJSC Severneftegazprom stipulates that a notice of the convening of a meeting of the Board of Directors in absentia with the application of explanatory materials on agenda items shall be sent to members of the Board of Directors not later than twenty (20) calendar days before the meeting date, and if the meeting is held in presentia, not later than fifteen (15) calendar days before the meeting date.

2.15 The Board of Directors holds a meeting at least once every two months as a rule.

2.16 The Articles of Association of OJSC Severneftegazprom stipulates that decisions on the most significant issues of the operating (production) and financial activities of the Company shall be adopted unanimously by elected members of the Board of Directors.

2.17 The Company has a Technical Committee. The main function of the Committee is to provide the Board of Directors with recommendations on all significant technical issues related to the Company's activities. Regulation on Technical Committee was approved by the Decision of the Board of Directors (Minutes № 19/2009 dated October 29, 2009). The Technical Committee is composed of 8 members; also, experts without the right to vote may be involved in its activities. The appointment of members of the Committee and the termination of their authority falls within the competence of the Board of Directors.

2.18 The Technical Committee under the Board of Directors hears reports of the General Director on the implementation of the Annual Work Program and the Budget of the Company; on the implementation of maintenance and overhaul programs; on the implementation of the plan for the upgrading, modernization, and technical upgradability of facilities; on the results of work performed in the field of labor protection and industrial and environmental protection; on the implementation of innovative and inventive activities.

2.19 The company provides the members of the Board of Directors with the information necessary for the effective fulfillment of their duties in preparation for meetings of the Board of Directors (including information in English), as well as additional information upon request of members of the Board of Directors.

2.20 The Technical Committee under the Board of Directors hears reports of the General Director on the implementation of the Annual Work Program and the Budget of the Company; on the implementation of maintenance and overhaul programs; on the implementation of the plan for the upgrading, modernization, and technical upgradability of facilities; on the results of work performed in the field of labor protection and industrial and environmental protection; on the implementation of innovative and inventive activities.

3.1 V.F. Veremyanina, Deputy General Director for Legal and Corporate Governance, holding a degree in law and having ten-year-plus management experience performs the functions of the Secretary of the Board of Directors. According to the results of 2011, 2012, and 2013, she was rated 2nd and 3rd in the Corporate Governance Directors Rating according to the Managers Association.

3.2 The election and termination of powers of the Secretary of the Board of Directors are carried out by decision of the Board of Directors.

3.3 The Company has created a structural subdivision (corporate regulation department), which ensures interaction between the Company’s management bodies in accordance with their competencies defined by the Federal Law on Joint-Stock Companies and the Articles of Association of OJSC Severneftegazprom.

4.1 The amount of remuneration provided by the Company to members of the Board of Directors, executive bodies and other key executives creates sufficient motivation for their effective work, allowing the Company to attract and retain competent and qualified specialists.

4.2 The members of the Board of Directors are paid a fixed annual remuneration in cash, the amount of which is calculated from the basic amount of remuneration, taking into account indexation in accordance with the current procedure for the formation of planned indicators in the Company, as well as the number of meetings in which a member of the Board of Directors participated.

5.1 The Company has a separate structural subdivision of internal control — the internal audit department.

5.2 The Company implements an anti-corruption policy (section of the Code of Corporate Ethics) that defines measures aimed at developing elements of corporate culture, organizational structure, rules, and procedures for ensuring the prevention of corrupt practices.

6.1 By order of the Director General, the procedures have been implemented in the Company to ensure the coordination of all services and structural subdivisions related to information disclosure or carrying out the activities that may lead to the need for information disclosure.

6.2 Information on the Company’s activities published on the corporate official website of the Company on the Internet is sufficient to form an objective view of the essential aspects of its activities.

6.3 The Company’s official website discloses information on the corporate governance system of the Company, on the executive body of the Company, on the composition of the Board of Directors and the Technical Committee as well as information on compliance with the principles and recommendations of the Code of Corporate Governance (Annual Reports of the Company).
Ethics and integrity

Since 2014, the company has been implementing a code of corporate ethics, establishing core corporate values as well as the most important rules of business conduct based on them and adopted by the company. The code of corporate ethics applies to all employees as well as counterparties of the company.

Since 2014, the company has been implementing a code of corporate ethics, establishing core corporate values as well as the most important rules of business conduct based on them and adopted by the company. The code of corporate ethics applies to all employees as well as counterparties of the company.

The interaction mechanism is implemented via e-mail and verbal telephone consultations. The Corporate Ethics Commission considers all complaints on a confidential basis. Anonymous messages are also subject to consideration. The company guarantees that reporting by employees any facts of violation of the code of corporate ethics will not cause negative consequences regarding the official position of the employee reporting such information.

Anonymous messages are also subject to consideration. The company guarantees that reporting by employees any facts of violation of the code of corporate ethics will not cause negative consequences regarding the official position of the employee reporting such information.

The Corporate Ethics Commission has overall responsibility for the communication mechanisms.

Responsibility for the organization of work to implement the requirements and provisions of the code rests with the Corporate Ethics Commission.

Florescence of complaints is mandatory for all new employees of the company when hired. In addition, the company provides regular training aimed at clarifying the basic rules of business conduct, which are regulated by the Code. In 2019, all employees of the company were trained in practices under the Code of Corporate Ethics.

The Corporate Ethics Commission has overall responsibility for the communication mechanisms.

In 2019, there were no cases of conflict or violation of the interests of the company, following the consideration of appeals by the commission.

An important part of the Code of Corporate Ethics is the anti-corruption policy aimed at compliance of the anti-corruption measures implemented by the company with applicable legislation. The anti-corruption policy is implemented taking into account the corruption risks the company may be exposed to due to its activities. The company openly informs counterparties, partners, and the public about its adopted anti-corruption standards of business. The company's management is actively involved in establishing a culture of intolerance to corruption and in creating an internal organizational system which efforts are to prevent and combat corruption in the company.

Principles of report preparation

The Company’s management confirms that it is responsible for the reliability of the data concerning the sustainable development published in this Report in order to satisfy the justified needs of such information on the part of its target users.

The structural subdivision of the Deputy General Director for Development and Strategic Planning of OJSC Severneftegazprom is responsible for the preparation of non-financial statements and the determination of key priorities for their content. Key topics and issues of importance for both the Company and the public were identified in the course of interaction with stakeholders and heads of subdivisions responsible for the economic, social, and environmental activities of the Company, and included in the working group on sustainable development.

The limits and level of disclosure of material topics included in the Report were also determined. Financial and economic results, well-being of employees, including professional development of personnel, and social projects in the regions where the Company operates as well as environmental safety are among them. Special attention is paid to issues of occupational and industrial safety, which reflects the Company’s desire to improve constantly the indicators in this area, as well as the volume of investments and labor costs.

The report provides information on the activities of all structural divisions of OJSC Severneftegazprom relating to the social area, results in the field of environmental protection and industrial safety for the 2019 calendar year. In order to prepare the Sustainability Report, data were collected and systematized on the grounds of internal corporate information requests.

OJSC Severneftegazprom sets the achievement of transparency of information about its activities as its main goal. Full disclosure of information and ensuring the quality of published data is the main value of the Report, which is based on the principles of international reporting in the field of sustainable development. The main approaches to the preparation of the Report are the balance, reliability, and essentiality of information on the economic, social, and environmental activities of the Company.

## Waste management

The wastewater discharge standard established in the Engineering Project for the Burial of Industrial and Domestic Wastewater at the Yuzhno-Russkoye Oil and Gas Field is within 500 m³ per day.

1. Wastewater is discharged by injection into an absorbing stratum.
2. Established standards for wastewater quality:
   - Petroleum products, not more than 150 mg/dm³. Suspended substances, not more than 300 mg/dm³. Methanol, not more than — 40,000 mg/dm³. TEG, not more than — 4,000 mg/dm³. Hydrogen sulfide, not more than 15 mg/dm³. Sulfates, not more than — 300 mg/dm³. Oxide iron, not more than 3 mg/dm³. Industrial rainwater is delivered to the Flottweg purification plant, where it is divided into three phases: oil products, the aqueous phase and mechanical impurities (dehydrated sludge). Further, the treated wastewater is mixed and sent for injection into an absorbing stratum.

</table>
306-3 No spills were recorded in 2019

306-4 Transportation of hazardous waste:
- Transported hazardous waste — 133.314 tons;
- Imported hazardous waste — 0 t;
- Exported hazardous waste — 0 t;
- Recycled hazardous waste — 0 t;
- The share of hazardous waste transported to foreign destinations is 0 tons;
- The principles for categorizing waste as hazardous and nonhazardous are based on Federal Law № 89-FZ On Production and Consumption Wastes dated June 24, 1998 (as amended on December 25, 2018).

306-5 There are no water bodies affected by wastewater discharge

OG-5 The total volume of formation water is 13.07 thousand m³.

OG-6 The volume of hydrocarbons flaring is 6,551,309 thousand m³, including 6,437,886 thousand m³ during well exploration.

OG-7 Accounting and disposal of drilling waste are carried out by a contractor

GRI 103 Management approach
103-1 Explanation of the material topic and its Boundary
65–66

103-2 Management approach and its components
92

103-3 Evaluation of the management approach
92

401-1 Personnel development and performance management
87–88

401-2 Occupational and personnel structure
85–87

403-1 Central Standing Commission on Labor Protection and Industrial Safety, Level IV, has been created and has been operating in OJSC Severneftegazprom

403-2 Labor protection
77–78

403-3 Evaluation of the management approach
77–78

403-4 The relationship between employees and the Company is based on the Collective Agreement

404-1 Personnel development and performance management
92–93

404-2 Personnel development and performance management
94

The total mass of nonhazardous waste, disaggregated by the following disposal methods, is 79,900 tons (including 2.9 tons accumulated in 2018):
- reuse — 0 tons;
- recycling — 0 tons;
- recovery — 0 tons;
- recovery, including energy recovery (transfer to a contractor) — 40.100 tons;
- injection into deep underground horizons — 0 tons;
- Placement at the landfill — 33,600 tons, of which at the contractor’s landfill — 5,600 tons, at the Company’s landfill — 28,000 tons;
- storage at the enterprise site — 9.100 tons;
- other — 0 tons.

The information was obtained on the basis of our data (regarding waste disposed of at the landfill) and standard data from the waste disposal contractor (regarding waste transferred to a third-party organization);

The increase is associated with the generation of waste accumulated during the treatment of industrial wastewater, due to an increase in the volume of condensate water, and the formation of solid waste disposed of at the landfill in connection with scheduled maintenance work at existing facilities.

The total volume of formation water is 13.07 thousand m³.

Wastes of I-IV hazard classes are categorized as hazardous, wastes of hazard class V — nonhazardous.

The principles for categorizing waste as hazardous and nonhazardous are based on Federal Law № 89-FZ On Production and Consumption Wastes dated June 24, 1998 (as amended on December 25, 2018).

The total mass of nonhazardous waste, disaggregated by the following disposal methods, is 79,900 tons (including 2.9 tons accumulated in 2018):
- reuse — 0 tons;
- recycling — 0 tons;
- recovery — 0 tons;
- recovery, including energy recovery (transfer to a contractor) — 40.100 tons;
- injection into deep underground horizons — 0 tons;
- Placement at the landfill — 33,600 tons, of which at the contractor’s landfill — 5,600 tons, at the Company’s landfill — 28,000 tons;
- storage at the enterprise site — 9.100 tons;
- other — 0 tons.

The information was obtained on the basis of our data (regarding waste disposed of at the landfill) and standard data from the waste disposal contractor (regarding waste transferred to a third-party organization);

The increase is associated with the generation of waste accumulated during the treatment of industrial wastewater, due to an increase in the volume of condensate water, and the formation of solid waste disposed of at the landfill in connection with scheduled maintenance work at existing facilities.
Interaction with stakeholders

In 2019, there were no cases of complaints about violations of the rights of indigenous peoples of the North. There are no disagreements with local communities and indigenous peoples related to the activities of the Company, as well as incidents involving the infringement of the interests of indigenous peoples (related to land, other relevant resources, etc.).

Due to the territorial remoteness of the Yuzhno-Russkoye Field from geographical locations assigned to various indigenous cultural groups, the Company’s production activities do not entail the need for forced resettlement of the representatives of indigenous minorities of the North. Thus, there are no cases of involuntary resettlement, both in terms of forced physical movement, and concerning the violation of the economic situation (loss of assets or access to resources) of households and representatives of local communities.

No accident was registered at the Company facilities in terms of occupational risks and production safety. In 2019, there were no cases of complaints about violations of the rights of indigenous peoples of the North.

The territorial remoteness of the Yuzhno-Russkoye Field from the geographical habitats of indigenous peoples eliminates a possibility for the local communities to get affected by the Company.

* All indicators disclosed in this Report are based on the 2016 version of GRI Standards.
ANNEX 3

METHODOLOGY FOR CALCULATING MATERIAL INDICATORS OF THE COMPANY OPERATION IN THE FIELD OF SUSTAINABLE DEVELOPMENT THAT RECEIVED INDEPENDENT ASSURANCE

INDICATOR  | CALCULATION METHODS AND LIMITS
---|---
Total employee turnover | The staff turnover rate is calculated in accordance with two methods:
  1) The methodology of PJSC Gazprom: the ratio of the number of employees resigned voluntarily and without good reason to the average headcount for the reporting period (the Headcount and Personnel Structure section);
  2) The GRI standards methodology: the ratio of the number of all resigned employees to the number of employees at the end of the reporting period (Annex 2 — GRI Content Index).

The indicator takes into account the employees of all subdivisions of the Company in accordance with the limits of the Report.

Number of injuries of personnel | When calculating the number of accidents for 2019, injuries of all types of severity were taken into account, which caused the employee to lose the working ability for at least one (1) day.

The indicator takes into account the employees of all subdivisions of the Company in accordance with the limits of the Report.

Pollutant emission weight | The pollutant emission is the sum of the emissions of nitrogen oxides, sulfur oxides, methane, carbon monoxide, volatile organic substances, and solid — expressed in tons. The calculation was made according to the Company’s emission sources located at PRODGGE, Gas and Gas Condensate Field.

Total water withdrawal by source | The total amount of water withdrawn is calculated as the total amount of withdrawn groundwater, stratum and purchased (munipal) water. The calculation includes water consumption by the Company’s subdivisions in Urengoy, Novy Urengoy, and at the Yuzhno-Russkoye Oil; Gas and Gas Condensate Field.

Total weight of waste generation | The total weight of waste is calculated as the total weight of waste of all hazard classes, generated in the Company’s subdivisions in Urengoy, Novy Urengoy, and at the Yuzhno-Russkoye Oil; Gas and Gas Condensate Field.

Total energy consumption | The total energy consumption includes the consumption of nonrenewable fuels (natural gas, gasoline, diesel fuel, and kerosene), purchased electricity less energy sold to third parties, and purchased heat. The energy consumption of each type is converted to GJ, taking into account the conversion factors.

The indicator includes energy consumption by the Company’s subdivisions in Urengoy, Novy Urengoy, and at Yuzhno-Russkoye Oil; Gas and Gas Condensate Field.

Percentage of competitive procedures from the total volume of procurements | The share of tender-based procurement is calculated as the ratio of the amount under contracts concluded with a counterparty that is the winner of tender to the total amount of concluded contracts for the reporting period. The indicator takes into account purchases of all subdivisions of the Company in accordance with the limits of the Report.

The indicator is calculated including VAT.

Procurement report of the reporting year includes procurement under contracts with a conclusion date within the reporting year. Contracts involving performance over several years are taken into account in the year of conclusion in full amount.

Number of cases of complaints of violations of the rights of indigenous peoples of the North | Cases of complaints of violations of the rights of indigenous peoples of the North for the reporting period are calculated based on entries in a single incoming complaint and feedback journal and feedback where all incoming complaints from stakeholders are consolidated.

The indicator takes into account cases of complaints of violations of the rights of indigenous peoples of the North received by all subdivisions of the Company within the terms of the report.

Absentee rate | The absence rate is calculated as the ratio of absence days to the total working time actually worked by workers for the reporting period.

Average annual training hours per employee, with a breakdown by gender and employee category | The indicator is calculated in accordance with the GRI standard as the ratio of the number of training hours to the total number of the corresponding category or gender.

Number of accidents | This indicator is disclosed based on data on recorded accidents in the reporting period. Accidents are understood in accordance with Federal Law № 116-FZ On Industrial Safety of Hazardous Production Facilities dated July 21, 1997.

Reduction of energy consumption | Electricity and natural gas savings were taken in the calculation.

The basis for calculating energy consumption reduction is a comparison with the reference year 2018 based on the goals and objectives of the Energy Management System.

ANNEX 4

REPORT ON THE RESULTS OF EXTERNAL ASSURANCE

INDEPENDENT PRACTITIONER’S LIMITED ASSURANCE REPORT (TRANSLATION FROM RUSSIAN ORIGINAL)*

To the management of Open Joint Stock Company “Severneftegazprom”

We have undertaken a limited assurance engagement of the information on sustainable development in the accompanying Annual Report for 2019 of OJSC Severneftegazprom (hereinafter referred to as Company) compliance with the requirements of GRI Sustainability Reporting Standards (hereinafter referred to as Standards). Informan on on sustainable development, included in the Report, means twelve material sustainability performance indicators published in the Report (hereinafter referred to as Selected Indicators) selected by the working group on sustainable development of Open Joint Stock Company Severneftegazprom (hereinafter referred to as OJSC Severneftegazprom):

1) Total employee turnover;
2) The average annual number of training hours per employee, by employee gender and category;
3) Number of accidents;
4) Number of injuries of personnel;
5) Absentee rate;
6) Number of cases of complaints about violations of the rights of indigenous peoples of the North;
7) Total energy consumption;
8) Reduction of energy consumption;
9) Total water withdrawal by source;
10) Pollutant emission weight;
11) Total weight of waste generation;
12) Percentage of competitive procedures from the total volume of procurements.

OJSC Severneftegazprom is responsible for preparation of the above information on sustainable development in the Report in compliance with the requirements of Standards. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation of the above information on sustainable development in the Report that is free from material misstatement, whether due to fraud or error.

OUR INDEPENDENCE AND QUALITY CONTROL

We have complied with the independence and other ethical requirements of the Rules of Independence of the Auditors and Audit Organizations and The Code of Professional Ethics of the Auditors (the Code), which are in accordance with International Standard on Auditing 2100 (Revised), Assurance Engagement - Audits and Reviews of Historical Financial Information. This standard requires that we plan and perform this engagement to obtain limited assurance about whether the Report is free from material misstatement.

Our responsibility is to express a limited assurance conclusion on the Selected Indicators compliance with the requirements of Standards based on the procedures we have performed and the evidence we have obtained. We conducted our limited assurance engagement in accordance with International Standard on Assurance Engagements 3000 (Revised), Assurance Engagements Other than Audits or Reviews of Historical Financial Information. This standard requires that we plan and perform this engagement to obtain limited assurance about whether the Report is free from material misstatement.

A limited assurance engagement undertaken in accordance with this standard involves assessing compliance of the Report with the requirements of GRI Sustainability Reporting Standards to the report prepared in accordance with the Core option.

A limited assurance engagement is substantially less in scope than a reasonable assurance engagement in relation to both preparation of the above information on sustainable development in the Report that is free from material misstatement, whether due to fraud or error.

*TRANSLATION NOTE: Our report has been prepared in Russian and in English. In all matters of interpretation of information, views or opinions, the Russian version of our report takes precedence over the English version.
the risk assessment procedures, including an understanding of
internal control, and the procedures performed in response to
the assessed risks.

The procedures we performed were based on our professional
judgment and included inquiries, inspection of documents, analytical
procedures, evaluating the appropriateness of quantification
methods and reporting policies, and agreeing or reconciling with
underlying records.

Given the circumstances of the engagement, in performing the
procedures listed above we have performed the following activities:
- Interviewing the management and employees of OJSC
  Severneftegazprom and obtaining documentary evidence;
- Study of information available on website of OJSC
  Severneftegazprom related to activities in the context of
  sustainable development;
- Study of public statements of third parties concerning economic,
  environmental and social aspects of OJSC Severneftegazprom, in
  order to check validity of the declarations made in the Report;
- Selective review of documents and data on the efficiency of the
  management systems of economic, environmental and social
  aspects of sustainable development in OJSC Severneftegazprom
  related to the Selected Indicators;
- Study of the existing processes of collection, processing,
  documenting, verification, analysis and selection of data to be
  included into the Report;
- Analysis of the Selected Indicators for compliance with the
  requirements of Standards.

The procedures were performed only in relation to values of Selected
Indicators for the year ended 31 December 2019.

The procedures were performed in relation to values of Selected
Indicators that are disclosed in the Report prepared in English.

The procedures performed in a limited assurance engagement vary in
nature and timing from, and are less in extent than, a reasonable
assurance engagement. Consequently, the level of assurance
obtained in a limited assurance engagement is substantially
lower than the assurance that would have been obtained had we
performed a reasonable assurance engagement. Accordingly, we do
not express a reasonable assurance opinion about compliance of the
Selected Indicators, in all material respects, with the requirements of
Standards.

LIMITED ASSURANCE CONCLUSION

Based on the procedures performed and evidence obtained, nothing
has come to our attention that causes us to believe that the Selected
Indicators has not complied, in all material aspects, with requirements of
Standards.

FEEDBACK FORM

DEAR READERS,

You have reviewed the Annual Report of OJSC Severneftegazprom
for 2019. Your opinion is very important for us, and we will be
